

GERMANY OFFERS 30 BILLIONS; FRANCE REFUSES

BLAINE TAX BILL IS RECOMMENDED

SPECIAL ORDER
OF BUSINESS IN
SENATE MAY 9

Showdown on Strength of Governor in Upper House Will Come Next Wednesday on Tax Measure

FIVE ABSENT WHEN VOTE
OF ENDORSEMENT IS TAKEN

Socialist Opposition Expected; Governor Explains Measure to the Committee

MADISON, Wis., May 2.—Governor Blaine's general tax bill, recommended for passage by the senate finance committee, Wednesday, was made a special order of business in the senate for Wednesday, May 9.

The senate finance committee reported the bill to the floor of the senate. It contained a recommendation for passage. Six amendments were offered in favor of the measure, with three against it.

A resolution, offered by Assemblyman A. H. Matheson, Janesville, was introduced recommending the senate committee report favor of the bill.

Five Absent

Five members of the committee, at least four of whom are expected to be present, are absent. Had they been present the bill would have resulted in a tie, or an adverse report.

Governor Blaine appeared before the committee to explain certain provisions of the measure. After the governor had given his explanation, answering questions of committee members, he retired, and the committee held session on his bill.

Assemblyman Matheson, socialist, appeared for the committee, explaining that the bill was a compromise between the two houses. He said that it would be a compromise between the two houses, and that it was a compromise between the two houses.

Blaine Refuses Compromise

Members of the senate finance committee, through the senate, have refused to accept the compromise. They have refused to accept the compromise. They have refused to accept the compromise.

Blaine Refuses Compromise

Members of the senate finance committee, through the senate, have refused to accept the compromise. They have refused to accept the compromise. They have refused to accept the compromise.

Blaine Refuses Compromise

BILL WOULD SLICE BADGER DELEGATION FROM 11 MEN TO 5

Re-apportionment Bill Offered
in New Congress Would
Halve House Membership

PROPOSE HIGHER SALARY
WITH FINE FOR ABSENCE

Declared Author, Clarke of New
York, May be G. O. P. Whip

WASHINGTON, May 1.—The new Congress will have five members of Congress instead of eleven as now, if the new Congress, which must reappoint the house in accordance with the 1920 census, adopts the plan of Congressman John D. Clarke, republican of New York.

Clarke proposes reduction in the size of the house from 435 to 217, increasing their salaries from \$7,500 to \$12,000 a year, but fining them \$100 per day for absence.

As a result of the decennial census of 1920, reapportionment of representation in the house is pending.

G. O. P. Needs Help

And Representative Clarke stands a good chance of being one of the real leaders in the new house. With their majority cut to the dangerous edge, with a rambounctious group coming in, and with the democratic much stronger than the republicans in parliamentary specialists, the republicans party leaders realize that every effort must be made for majority party cohesion. The strongest help toward attaining this is through carefully selecting the republican "whip," who will not only act as a "bell weather of the flock" on party votes, but will keep the floor leader and steering committee advised at all times as to where the sore spots are that must be healed, or where there are intra-party wrinkles to be ironed out.

Representative Clarke has been mentioned more than any other member as the most desirable man for this work. If he is "whip," he will be in a strategic position to put through any legislation in which he is particularly interested, or to which he has pledged his support.

Proposed Division
In his bill as now drafted, Representative Clarke proposes the apportionment of the 217 members of the

house among the several states as follows:
Alabama, five instead of ten; Arizona, one as at present; Arkansas, four instead of seven; California, seven instead of eleven; Colorado, two instead of four; Connecticut, three instead of five; Delaware, one as at present; Florida, two instead of four; Georgia, six instead of twelve; Idaho, one instead of two; Illinois, fourteen instead of twenty-five; Indiana, six instead of thirteen; Iowa, five instead of eleven; Kansas, three instead of eight; Kentucky, five instead of eleven; Louisiana, three instead of eight; Maine, one instead of four; Maryland, three instead of six; Massachusetts, eight instead of sixteen; Michigan, eight instead of sixteen; Minnesota, three instead of ten; Mississippi, three instead of eight; Missouri, seven instead of sixteen; Montana, one instead of four; Nebraska, two instead of six; Nevada, one as at present; New Hampshire, one instead of four; New Jersey, six instead of twelve; New Mexico, one as at present; New York, twenty-two instead of forty-three; North Carolina, five instead of ten; North Dakota, one instead of three; Ohio, twelve instead of twenty-two; Oklahoma, four instead of eight; Oregon, one instead of four; Pennsylvania, nineteen instead of thirty-two; Rhode Island, one instead of three; South Carolina, three instead of seven; South Dakota, one instead of three; Tennessee, five instead of ten;

Texas, ten instead of eighteen; Utah, one instead of two; Vermont, one instead of two; Virginia, five instead of ten; Washington, two instead of five; West Virginia, three instead of six; Wisconsin, five instead of eleven; Wyoming, one as at present.
Salary Raises
Representative Clarke's bill proposes that the compensation of the speaker of the house of representatives and the vice president of the United States shall be at the rate of \$15,000 each per annum. The compensation of senators, representatives in congress, delegates from territories, resident commissioners from Porto Rico and the Philippine Islands would be at the rate of \$12,000 each per annum.

"CLARA" TRIES ESCAPE
TEGUCIGALPA, Honduras.—The American woman held here by police as Clara Phillips was talked in her attempt to escape from jail.

H. RENTZ, FORMER VERNON LEGISLATOR, BURIED AT ESOFEA

VIROQUA, Wis.—The funeral of Henry Rentz, former Vernon county Assemblyman who passed away on Friday at a La Crosse hospital was held at the Rentz home at Esfoea, on Friday afternoon. Mr. Rentz had held many offices of importance in the county, before being elected to the legislature at Madison.

A tree planting campaign is progressing favorably in this city. The Viroqua Community club, appointed the city council as a committee on tree planting, and a plentiful supply of hard and soft maple and elm trees has been secured. These trees are sold to property owners at the

low price of forty cents each and are being planted by the city—free of charge to all who wish to purchase, them and help beautify the city. Many of Viroqua's beautiful shade trees were ruined during the ice storm, two years ago.

This is the SECOND of a series of advertisements dealing with the distinctive features of Lloyd Loom Carriages.

Loom weaving gives Lloyd carriages unusual beauty

LLOYD LOOM CARRIAGES are woven on a remarkable loom, which not only weaves the entire body of a single, continuous strand of finest wicker, but shapes the body, as it weaves, into a graceful bowl shape. Naturally, this flawless weaving of the desired shape produces a carriage far more beautiful than any carriage which is made of flat wicker fabric, cut into pieces and tacked on a frame. In addition, the speed with which this loom weaves cuts the price of Lloyd Loom Carriages to a point at which no other carriage can compete.

Other Lloyd Superiorities—
Lower priced because loom-woven in one-chitch the time required for hand weaving.
No short ends of wicker to work loose.
Handsome one and two tone finishes.
Harmonizing upholstery.
Steel pulleys in line with carriage frame.
Oil tempered springs.
Fifth wheel reversible gear.
Steel wire hearts in all upright wicker stakes.
Patented automatic hand adjustment.
Wire core of tires electrically welded to prevent wear.

WHO IS WISE?

WHO is a wise man and endowed with knowledge of wisdom among you? Let him show out of a good conscience his works with meekness of wisdom.—James 3:13.

A Blow at the Masses

RECONSIDERATION by the assembly of the Gary bill abolishing the state board of education upon the penny-wise idea of saving \$25,000 a year at the expense of abandoning considerations of policy and economy in the administration of \$50,000,000 a year, stamps the progressive movement in Wisconsin as lacking both knowledge and prudence.

Education, old-age dependency, unemployment, and the substitution of rehabilitation for penalization, are the prime essential problems of progress, and of these the most critically impelling is education. Yet the legislature remains either deliberately unsympathetic or blissfully ignorant of these great pivotal problems of human welfare, and actually seems about to lay destructive hands upon the single constructive advance which education has made—the state board of education.

Those who at this time have been entrusted with the destiny of the progressive movement in Wisconsin may well pause to consider these things. Should they permit the cause of progress to degenerate into a program dealing only with the individual's meat and drink, and with the rival material aspirations of various groups, they would have difficulty in giving an accounting of themselves to a people who already understand that these things are merely the means to far greater ends.

One recalls the high hopes with which the little group of pioneers who surrounded Senator La Follette in the early days of the century looked to a state in which better opportunities should grow a finer human product. These pioneers of the new democracy will have little patience with programs and policies destructive of this ambition to build up here a super-commonwealth in which liberty shall flower in the finer spiritual and intellectual attainments of the mass. We must deal with taxes, transportation and the other necessities of community life. We must protect equal opportunity by legislation. But we can not legislate equality of ability or equality of the attributes of individuals. All that we can do is to make sure that the mass shall go forward in these things, not backward and downward. And education is the key to the door of progress.

The progressive administration represented in the present legislature has been struggling earnestly with the problems of material life. Thus far it has given little thought to the great objectives of the government looking to a greater free democracy. It has come in contact with the organized effort to feed intellectual and material growth only in its dealings with the state board of education. It had been thought that this great agency of progress might be established on a firmer basis with a broadened scope for public service. Instead, we find its repeal imminent and that at the hands of representatives who more nearly than any of their predecessors were selected by the people who live close to the soil. These—the general run of us—would profit most by better educational advantages, because it is they who proportionately have less than their fair share today.

The issue which the assembly faces upon the bill to repeal the state board of education will not end with the abolition of that department. If the assembly passes the measure, the issue will go to the people of the state. The wisdom and foresight of the La Follette movement will be put to the test. No group can strike a vital blow at the schools of this state without suffering the consequences. Precient progressives, including Senator La Follette, could make but one answer to such a situation. They would be obliged to repudiate the backward step and to set up here a new leadership and a new group of law makers. In our judgment, should the assembly pass the Gary bill, this act would account for many new faces in the 1924 legislature. The time for assemblymen to count the cost of hasty and uninformed action upon this measure is now. To count the cost later will be politically fatal to them, for they must foot the bill at the polls in 1924.

"His Best Violence"

HAD not Governor John J. Blaine ever a saving sense of humor he might have given way to exasperation at the admonition to "get together" patronizingly addressed to him by those whose principal occupation has been the dismemberment of the administrative organization. Numerically, of course, the governor is advised to let the tail wag the dog, but Governor Blaine has rather a dogged way of insisting upon wagging his own political tail. Indeed, were the impertinence ever so annoying, it is improbable that the governor could have refrained from a chuckle at this new approach by ambitious insurgents who had committed the indiscretion of entering the paternal woodshed without wearing the traditional shingle in the seats of their trousers. But with his hand still smarting from the application of the political blackthorn to the southern exposure of the now conciliatory recalcitrants, Governor Blaine would no more than be human should he pause to congratulate himself upon the skill with which, after having been sorely put to it, he had matched poison pens with his foci.

Probably there will be no difficulty about the odds and ends of disgruntled factionalism which remain unimpressed by the governor's 200,000 victory "getting together" with the governor provided they have in mind the etiquette of government which requires Mahomet to go to the mountain, for no doubt this is a case in which the mountain will not go to Mahomet.

Nothing like the paternal razor strap to make the delinquent want to "get together" with the old man, and how it works! Of course there are some tremendously important principles of republican government upon which it is shrewdly felt that "we" progressives should "get together." There are, for instance, those great fundamentals of democracy involving the disposal of government patronage. Our republican institutions would indeed be imperiled could not the "right people" "get together" upon these vital problems. And so it is not strange that those who have felt the shins of the parental rod should seek to barter a diet of husks for the loin of the fatted calf.

Perhaps Governor Blaine's magnanimity may be inclined to yield to his prudence, but he may reflect upon the possibility of "getting together" so closely as to receive the reward of a stiletto between his political shoulder blades.

The pleasure that has been experienced in the state at the spectacle of a harassed official fighting his foes toe to toe upon the doorstep of his political citadel has not been confined to progressives who have always believed that Governor Blaine should receive the public confidence voted in him by the people of the state as their administrative leader. Many who have disagreed with him broadly have appreciated both the forbearance with which he met the issue until patience ceased to be a virtue, and the vigor with which he crossed the steel of his enemies when, in the open, discretion had ceased to be the better part of their valor.

However, we doubt that even one so patient as Governor Blaine will be first to extend the palm of friendship to the mailed fist. Probably he will insist upon receiving the swords of his enemies hilt first as an evidence of capitulation, before there is any hand shaking. This is not the first time he has met Greeks bearing gifts, and his political prudence is not in his adolescence. Having passed with his best violence to the surprise and discomfiture of his antagonists, one may guess that his answer to admonitions to "get together" was a smile—a wary smile.

In Ye Olden Times

TEN YEARS AGO TODAY

Miss Mollie Gedney of Onalaska has been elected president of self-government association at the state university, Madison. This association is the co-ed students' council.

T. S. Chilson, for six years La Crosse manager of the Shafer-Pierre Dental Supply company, left today with his family for Rochester, N. Y., where he has accepted a lucrative position.

Father Byrne, diocesan missionary with headquarters at St. Francis hospital, left this morning on a missionary tour.

E. M. Wink has gone to Brian Cliff Lodge, N. Y., to attend the spring meeting of the executive council of the American Bankers' association.

TWENTY YEARS AGO TODAY

Tomah is to have a pickle factory. The H. J. Helz company, which now has a factory at Sparta, will establish one in Tomah soon. Farmers in the vicinity are well pleased with the prospects.

W. W. Conway, the well known way freight conductor on the river division, and Miss Josephine Dean were married yesterday at the home of the bride's parents in Hastings, Minn.

Last evening Rev. Henry Faville of La Crosse presided at the dedication of the new church at De Soto. The Y. W. C. A. has leased rooms over Coran's store for one year, the contract being signed yesterday. Monday morning L. P. Phillips, the directory man, started out to get up the new directory for the city of La Crosse. He estimates there are now 24,000 people here.

THIRTY YEARS AGO TODAY

August Grams, vice president of the Funk Boiler works, has severed his connection with that firm and will start a boiler works in Winona. He moved his household goods to Winona last week.

E. Fay will open an insurance and real estate business with offices on Main street.

Hon. A. A. Leissring has rented an office on the third floor of the McMillan building and will conduct a life insurance business.

Stoize and Schick are drawing plans for a new \$3,000 residence for C. H. Hogge on Caledonia street. The house will have all modern improvements and will be heated by steam.

Observer Simons received special advices from Washington this morning that the river would reach four feet by May 7.

Men are at work tearing up the old street car tracks and laying down the ties and rails for the new electric railway on Main street between Sixth and Eighth, today.

Creating the Conditions

By CORONA REMINGTON

Jim Norton looked up from his desk as his son came into the office and saw at a glance that the trip had been unsuccessful.

"Father, I guess I'll never get to be vice-president of the firm, no matter how hard I work. I simply don't seem to have a business head."

"Nonsense. Just because you failed once is no reason for talking that way."

"Yes, but all the time I sat there talking to old Andrews I kept thinking 'If dad were here he'd tell me twice as much as I'm getting out of this, and I'm going back without a thing.'"

"Something wrong with your method, son? You've hardly tried this prospect from start to finish, suppose you tell me about it and we'll see where you got off the track."

The Norton president and owner of the Norton Boiler Works, leaned back in his chair and listened to his son's story.

"Well, Anderson wrote us a letter about six months ago asking for rates and so forth. I answered immediately and offered to run down and talk it over with him. I made the prices as attractive as I could. It was a big order and we could afford a pretty good discount."

"You stressed the price primarily?"

"Yes, I got a little inside tip he was in correspondence with the outfit Boiler people and knew we'd have to cut pretty close to meet them."

"That's just where you got on the wrong track. I was with the road. I never talked much about price. You have got to make the prospective customer want your boiler, because of something about that boiler that appeals to him, and it's up to you to create the conditions. That's true of everything in life. You're going to be too prone to try for results instead of for conditions that will bring about the results naturally. I never tried to sell one of our boilers in my life. I tried to make the customer want to buy our boiler, and then the selling did itself. If instead of talking price to Anderson, you had ignored the money side and stressed the merits of our product, you would probably have got the order. When a man is investing say \$15,000 or \$20,000 in something, he'd rather spend even a little more and get what he wants, and what he believes is a superior product, than to buy the cheaper one, so it's up to you to make him want our stuff. Create the conditions, son."

"I see," said young Norton. "But do you think that's true of everything in life?"

"Absolutely. Can you think of a case where it would not work? It's simply more obvious in some instances. If you wanted a flower bed of large dahlia blossoms, you wouldn't merely run around saying, 'I want a flower bed of big dahlia blossoms.' You'd get the finest roots you could find. You'd constantly give them an occasional side dressing of some kind of plant food. In other words, you'd create the conditions and nature would do the rest."

Young Norton went to his office, his head whirling with new ideas. Why hadn't his father told him sooner and thus saved him from making this blunder? He thought of the many things he had done wrong in his life. He had defeated him half the time. He spent the rest of the afternoon thinking and planning, but his thoughts were not altogether taken up with business matters.

"Dad, may I have my two weeks off now?" he asked his father as they went down in the elevator together.

"Pretty early in the year for a vacation, son. What do you want to do with those two weeks?"

"Create some conditions," the young man said.

"I don't see how you can approve of my idea, anyway," laughed Norton. "Now, you want to try it out, eh?"

"Exactly."

"Well, I see no particular reason why you should go Saturday afternoon if you want to."

"Thank's, dad, and when I come back I'll have some words to report to you."

"Good for you. I know you will."

Although Norton's curiosity was aroused to learn what the nature of those results that his son was planning to bring about, and in the end of business that followed as a result, he had little time for conjecture. It was nearly three weeks later when young Norton burst into his father's office and flung his hat in the air.

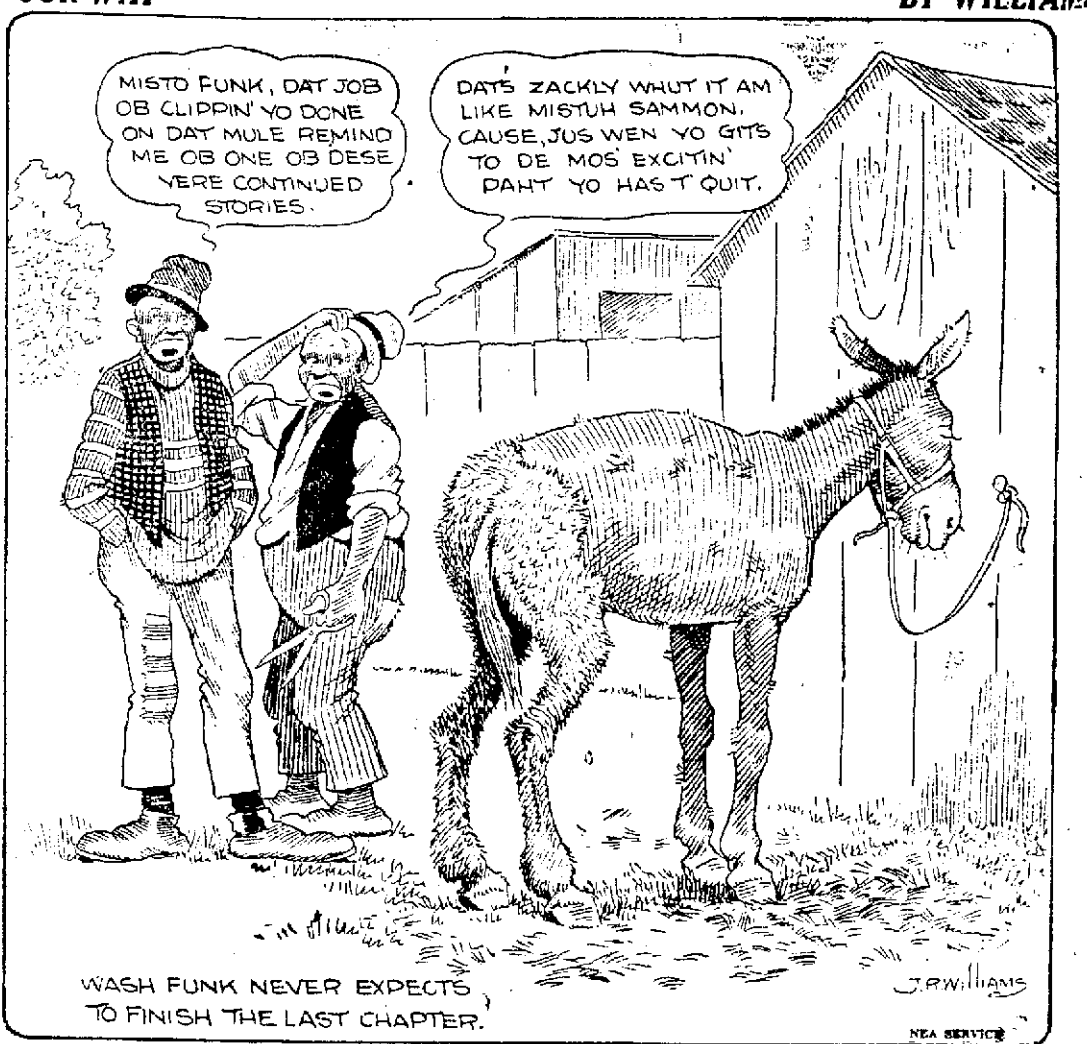

"I did it," he exclaimed. "I did it!"

"Did what?" his father asked mildly.

"I suppose you elucidate."

Young Norton engaged the loveliest, prettiest girl that ever lived. Wait till you see her. I've been in love with her ever since I first met her."

OUT OUR WAY

We went everywhere together and I treated her like a child, or a sister. It was the hardest thing I ever had to do in my life, but somehow I got through. Then I proposed again and she accepted me. I can't believe it yet. I wanted it so long and so hard."

Mr. Norton rose and put a gentle hand on his son's shoulder.

"I'm mighty glad for you," he said. "But you haven't told me yet who my new daughter-in-law is."

"Katherine Sedgwick," the outcast Boiler people's daughter," exclaimed Norton.

"Yes, that's where I got the inside tip about old Anderson. He had a daughter. Where did you meet her?"

"At one of the variety dances. I've loved her ever since. She says her father'll want to consolidate with us."

Mr. Norton thought a minute.

"I would not have had my son marry for business reasons for the world, but nothing could have been better for us. It's the worst competitor we have in the field. I never knew such a streak of luck."

"You can have the business side of it, dad. All I want is Katherine," laughed young Norton.

"Bunny, I've always dreamed of getting hold of Sedgwick somehow, but I had no idea it would ever come about."

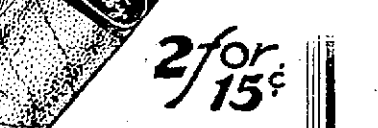

"You must have created the conditions," laughed the young man.

"I guess I did when I married your mother and we had a son," answered Norton with a twinkle in his eye. (Copyright, 1922, by McClure Newspaper Syndicate.)

LETTERS IN DEATH PILOT

BERLIN.—More than 500 letters are being read in court here as evidence in the murder trial of Frau Ruppe and Frau Klein, young women charged with poisoning their husbands. In their letters they reveal minute details of the alleged death of, says the prosecutor.

ADRENALIN—LIFE-SAVING DRUG

BROOKLYN.—Science has at last succeeded in bringing the dead back to life.

But its power works only on infants, not adults.

More than two months ago a baby, one of twins, was born dead. Today he is as much alive as his little twin sister.

In Spring Lake, N. J., another youngster was born without any signs of life. Three times it again died, before science succeeded in restoring it to life.

The secret of this new life was found in the gland of a sheep. And the application of this fluid, called "adrenalin," was first made on babies by Dr. Philip Mininberg at a hospital in Brooklyn. He is now being heralded as a savior of mankind.

Last February Mrs. Bertha Isaacson gave birth to twins. The girl was normal, but the boy's heart and lungs refused to function. It was Dr. Mininberg's opportunity to try his experiment. With a hypodermic needle, he pierced the chest wall, injected a solution of adrenalin directly into the heart, and waited. The heart began to beat and life came back. And it lasted.

"Daniel is as healthy now as any baby of his age," says his mother proudly. "He's as husky as his sister, and weighs half a pound more."

Dr. Mininberg explained the use of the new drug.

"The use of adrenalin in the case of infants should mean that a great number of the babies who come into the world stillborn will be restored to life," he said.

"From 10 to 15 per cent of the babies are asphyxiated at birth but this is easily overcome by slapping them or by a sudden application of cold water. Some physicians even dangle them for a moment by the feet."

Adrenalin, however, finds its usefulness in the severer cases where the infant is to all intents dead."

Dr. Mininberg, however, holds out little hope to those who would assume that adrenalin is to become the universal restorer of life.

"It would be of little use to adults," he pointed out, "because the disease which caused death would still remain."

"Yet there is an instance on record where a 'dead' man was by the use of adrenalin, restored to life for eight hours. I have seen cases where a half hour or more. But the recovery was never for long. It is only that the physician is bound by all in his power to preserve life as long as possible."

But the writer of this "Hot Lips" song was shaking of an old flame.

Now a QUICK Quaker Oats

Cooks to perfection in 3 to 5 minutes

Tell Him Which

Your grocer has two styles now

Now there's an oat dish almost ready to serve. It is called Quick Quaker—the quickest cooking oats in the world. Get this style, and your oat dish—perfectly cooked—is ready before the coffee.

No other oat dish compares in quick cooking.

The same delights

The same extra quality, the same delicious flavor. All Quaker Oats are flaked from the finest grains only—just the rich, plump, flavory oats. All the flavorless grains are discarded. So we get but ten pounds of these premier flakes from a bushel.

That's the reason for the Quaker fame. Millions of mothers, all the world over, send for Quaker Oats so children get that flavor.

Quick Quaker has that flavor. But the oats are cut before flaking. They are rolled very thin and are partly cooked. So the flakes are smaller and thinner—that is all. And those small, thin flakes cook quickly.

If your breakfasts are hurried and you want a quick dish, Quick Quaker is ready in from 3 to 5 minutes.

But get this Quaker quality, this super-flavor anyway. Serve this supreme food at its best.

Regular Quaker Oats Come in package at left—the style you have always known.

Quick Quaker Oats Come in package at right, with the "Quick" label. Your grocer has both. Be sure to get the style you want.

METHOD OF MAKING STUNTED CHILDREN TALLER IS SOUGHT

Search for Means to Increase their Height Conducted by Cleveland Board

CLEVELAND.—Search for some means to make small, stunted boys and girls taller, as well as a comprehensive attempt to classify children for the work to which they are physically and mentally suited, is now being made by the board of education of this city.

A few of the questions which the investigation, under the direction of Dr. Edw. T. Baldwin, psychologist of the University of Iowa, is expected to answer are:

At what age do children attain their complete physical growth?

What is the effect of physical condition on intelligence?

If a child's weight can be increased by diet, what can be done to increase his stature?

Every child in the five schools, a total of 3,500, is to be examined thoroughly, both physically and mentally.

The physical examinations are already under way under the direction of Dr. L. W. Childs, director of school health work in Cleveland, with school physicians, nurses and dentists co-operating. This investigation will be followed by a health campaign to eliminate physical defects.

COAST GUARDS ON LAKES PREPARE FOR BUSY SEASON

LA CROSSE, Wis.—When the first season of the local fishing fleet began winding its way through the ice dotted waters of Lake Superior a few days ago, the local coast guard station, one of the largest and busiest on the Great Lakes, automatically became alert. The job of keeping track of the innumerable little fishing vessels which leave the ice laden waters to reach their casting points far out in the lake, is the most important one of the local station.

Next to Chicago and Buffalo, the Duluth station ranks as the busiest on the Great Lakes. The post is responsible for the Upper Lake region. From March 1 to January 1 it maintains a 24 hour guard in the watch tower on Minnesota Point. Since the station opened March 1 the guardmen have been overhauling powerboats and otherwise preparing equipment.

HEARSE RIDE IS FATAL

LONDON.—Several youths appropriated a hearse and went for a joyride. They asked Cyril Thomas Roberts, 21, to join them. As he climbed into the vehicle he fell to the pavement and died from skull fracture.

5000 CHICAGO WORKERS BOW TO "LABOR QUEEN"

By ROY GIBBONS
NEA Staff Correspondent

CHICAGO.—A queen in her own right is Mrs. Florence V. Murphy here.

Monarch of all she surveys, 'tis with matchless smile and an iron hand she rules her 5000 subjects.

They're all men—members of the gas workers' union, the bootblacks' and the street sweepers' unions.

Down to the very last, each member obeys her commands in snappy double-time precision.

"Queen Murphy," as she is jokingly called, came into the "throne" by right of lawful succession a month ago.

This was when her husband, the famous "Big Tim" Murphy was sentenced to four years at Leavenworth after having been found guilty of participation in the \$500,000 Dearborn Street mail robbery.

Murphy Labor King

Murphy was known as Chicago's labor czar. He held allegiance by the night of his fists and a well-stocked "back of the yards" vocabulary on invective.

When the federal chaparral appeared and announced the jig was up, "Big Tim" kissed Mrs. Murphy goodby and laughingly charged her to "carry on, Flo."

An "that's what she's been doing since, meeting with a success that proclaims itself.

All her subjects swear by her, and there's not a man among the lot who wouldn't risk his neck and the necks of all his friends too, should "Queen Murphy" demand such a sacrifice.

Her Broad Powers

By a mere tilt of her eyebrows she could make Chicago frigid with unshined boots.

And hers is the power also to interfere with the city's gastronomic affairs for the gas workers are the chaps who make the fuel which causes the range to burn the steak, and without them no steaks could be cooked.

Likewise she could tell the street sweepers to take up their golf sticks and run away to the country over the week end which would leave the many avenues up to their curbstones in dirt.

But "Queen Murphy" isn't doing any of these things.

"She's long on mediation and short on fireworks," say those who know her best.

"I'm here to stay and will do my best till Tim gets out," she announces.

"The boys have faith in me. And

MRS. FLORENCE V. MURPHY

I'm not one to let any faith be misplaced.

"Shooting from the shoulder is my motto and that's all there is to it," she says to Mrs. Murphy. "We're for you," shouts her kingdom. "You get us good pay, you bring us cheer, maybe some day you'll get us beer, Hurra for Mrs. Murphy."

30 SKELETONS FOUND

MONTAIRE, France. A steam plow unearthed an ancient dungeon on a farm near here in which skeletons of 30 men, women and children were found. They are thought to have been imprisoned and starved to death.

Enjoy Acid-Free Stomach Counteract the Cause

Why suffer with your uneasy stomach distress? Acid simply cannot exist in the same stomach with a few M-O-Na Tablets. Harmless, inexpensive, non-habit-forming, M-O-Na instantly corrects acid stomach and resulting ailments. Occasional use of M-O-Na Tablets will end your stomach troubles without abuse. Sold, guaranteed and money-backed by druggists everywhere and by Hoechstler Bros.

death in the course of the 16th century wars.

Leigh Hunt, dead more than 60 years, has a poem in the London Mercury that its editor says is published for the first time.

A Sure Way To End Dandruff

There is one sure way that has never failed to remove dandruff at once, and that is to dissolve it, then you destroy it entirely. To do this, just get about four ounces of plain, ordinary liquid arven from any drug store. This is all you will need. Apply it at night, when retiring, use enough to moisten the scalp and rub it in gently with the finger tips.

By morning, most if not all of your dandruff will be gone, and two or three more applications will completely dissolve and entirely destroy every single grain and trace of it, no matter how much dandruff you may have. You will find, too, all itching and itching of the scalp will stop instantaneously, and your hair will be shiny, lustrous, glossy, silky and soft, and look and feel a hundred times better.

AMERICAN COLLEGE IN ATHENS SOUGHT BY GREEK NATION

Cabinet Invites Schools in Anatolia Closed by Hostilities to Come to Greece

ATHENS.—The movement for the establishment of an American university in Greece similar to Robert College at Constantinople took definite form recently when the Greek cabinet resolved to invite all American schools in the interior of Anatolia—closed during the past year owing to hostilities—to move to Greece. This invitation includes half a dozen small American colleges in Smyrna, Marsovan, Tarsus and Adana. Greece will give free land, tax exemption and every possible assistance and encouragement, and a Greek committee, headed by the king and queen, will be formed to obtain monetary assistance from wealthy Greeks at home and abroad. The government will set aside a large tract of land in the vicinity of Athens with ample lands for the growth during the next 25 years of a complete American university including medical, agricultural and technical

schools of the most modern American plan. The near east relief, co-operating in the scheme, proposes to build immediately seven stone buildings as an orphanage for two thousand children, and these buildings will eventually revert to the American university for use as dormitories.

It is the hope of the Greek government to establish a group of schools where the youth of the entire near east can come and receive western training. The present plan is largely the result of conversations two

months ago between the young Greek king and Doctor Barton of New York, who represented American educational interests at the Lausanne conference. The first school to take advantage of the offer will be the American girls' school of Smyrna.

LONDON.—Scotland Yard discovered cocaine was being smuggled into England from Germany, concealed in heels of the smugglers' shoes. One smuggler was seized and sentenced to prison.

GIRL SCOUTS TO REFORM MODERN JAZZ DANCING

By MARIAN HALE
NEW YORK.—The Girl Scouts of the Bronx, 2500 strong, have banned the modern dance—as is.
And each member has pledged herself to reform her own dancing and that of as many others as she can.
“Since the jazz craze is beginning to wane and teachers have returned to the proper status,” explains Miss Agnes Buckley, director of the Bronx troops, “we believe that more proper ideas regarding correct form in dancing may at last make some impression.”
“Our girls are from 12 to 20 years old—right at the impressionable age. By teaching them correct positions and the proper use of their arms and legs, we believe they will want to conduct themselves properly elsewhere and they will set a good example for careless dancers.”

Approved Form.
Check to check dancing, close positions and awkward and vulgar methods of holding will be some of the faults corrected. Miss Buckley explained the position they endorse as follows:

In taking the correct position for the dance, the wrist and fingers, or the inside of the wrist and back of the thumb, of the man's right hand should rest lightly some distance above the woman's waist, while the woman's left hand should rest on the man's shoulder, not hooked about his arm, with her head facing in that direction.
“Her right hand should lie flat in the man's open left hand, while the man's left arm may be either held up parallel with the body or extended outward nearly straight, inclined slightly upward. Right now the latter position is preferred, but the former does not prove so tiresome.”

No Holding.
“Partners should stand erect and far enough apart for each movement, the girl bending herself, so as to be easily guided. She should not collapse in his arms or should be grasped too tightly.”

Here are some further instructions:
“Dance with the feet but keep the head and shoulders in repose.”
“Do not shuffle the feet or pound the floor with the heels and do not bend the knees except when making dips.”

“Do not wriggle the hips or shoulders and do not pump the arms and elbows.”
“Do not hop or bounce but glide smoothly and gracefully.”

The organization has endorsed Edna Stuart Lee's book, “Thirty Fox Trot Steps,” and has made that the standard for dances at the club-house.

MANNERS
By NORMA TALMADGE

MEN'S CLOTHES
There is a woman admires a well-dressed man. She admires him with a mixture of admiration and envy. She is expecting about what she can expect from a man of his class. American men are guilty of many of the same faults as the women. They are not so much as they should be. They are not so much as they should be. They are not so much as they should be.

1. The full dress suit must be perfect in fit, cut and material. It should be made of dark-faced black, worsted, with satin facings and collar and cuffs. The trousers should be of the same material and color, but not so wide as the trousers.

2. With the full dress suit wear a white shirt, white waistcoat, white lawn tie, white handkerchief, white gloves and white buttonholes. English silk hat, white or black, and white knickerbocker boots, pumps, shoes or ties and plain black silk socks, black or dark blue overcoat, plain wood stick. The pattern leather pumps should be worn only when it is the occasion to dance.

3. With the dinner coat wear trousers with broad pattern, than the full dress trousers; white or black waistcoat, plain black, silk or satin tie.

4. Business suits should be conservative and whether a man can afford two or two hundred, if he wishes to be exactly proper and to appear to best advantage, he never should wear the same suit more than a day consecutively, but should alternate.

5. Jewelry should be worn conservatively; there should be nothing extravagant, brilliant or garish.

6. It is bad manners for a man to wear a fawcett ring on his third finger. It should be worn on the little finger.

THE MAN'S HAT
The mark of a king is his crown. The mark of a gentleman is his hat, and how he handles it. This hat has a small language all its own. There is a subtle hint for every occasion and a suitable style of hat for every head. A man's method of lifting or doffing his hat may be as expressive of gentility as his bearing in a ball room.

A man takes off his hat when riding with a woman in an elevator in a club, hotel, apartment or store; when he comes to speak to a woman on the street; when he must wait for a funeral to pass, when the national colors are passing, and when the national anthem is played.

A man merely lifts his hat as a conventional gesture to strangers, wherever he must recognize their presence.

A man lifts his hat when offering a woman a seat in a car, and again when she thanks him—which she would invariably do.

Whenever a man unavoidably chides on a woman, as when meeting her in a narrow passage where he must make way, he lifts his hat.

A man lifts his hat and bows when meeting acquaintances or friends, the exactness of his bow and the cordiality of his smile being the measure of the impression he would create.

It is bad manners for a man to keep a cigarette, cigar or pipe in his mouth when he lifts or doffs his hat or bows.

Household Suggestions

IMPROVING ICED TEA
Put sprigs of mint into your lemonade. The flavor will be greatly improved.

SALMON SANDWICHES
Salmon sandwiches are improved if you add thin slices of cucumber.

HOME-MADE BREAD
To make your home-made bread shine as if it had been varnished, wash it with vinegar when it is almost baked, then return to the oven for a few minutes.

WITH POWDER PUFF
The newest idea in handkerchiefs is the small one of colored linen with a tiny pocket in one corner in which a small powder puff may be carried.

SAVING BUTTONS
A button box is apt to be a great nuisance as it fills rapidly and it is hard to find just what you want. A better way is to run the buttons on safety pins, putting the same sizes on the same pins and fastening them. It is easy to find what you want and you have no difficulty assorting them. Keep in a wide-mouthed jar or tin box.

BEADED SUIT
A smart suit for summer is of blue beaded silk. On the jacket, the pattern of the beading is followed in small cool beads, and a border is treated in the same fashion. A collar of gray fox completes the outfit.

COOKING ODORS
If you wish to keep your house free from the odor of cooking do not let your sauce pans boil over, and remove all pans directly from the stove when you have finished with them.

PLAIN SKIRT
A skirt of plain black satin is often joined to the most elaborately beaded or embroidered blouse in the most violent colors.

MARSHMALLOWS
When you have no whipped cream for your hot chocolate use marshmallows instead. Some people prefer them.

POTATO CHICKENS
By BERTHA E. SHAPLEIGH
Of Columbia University.

These potato chickens are very attractive to serve at a children's party. The ingredients are:

Three cups hot mashed potatoes, three tablespoons butter, one teaspoon salt, one-eighth teaspoon pepper, one egg, and yolks of two eggs.

Add the butter, salt, pepper and eggs to the potatoes, and beat well. Cool, and shape with the hands into chicks. Brush over with egg, and set in oven to bake. For eyes use whole black pepper, or peppercorns as they are called, and for the feet, whole cloves. Serve on a bed of watercress or parsley.

These chicks may be rolled in flour, dipped in egg diluted with water, and rolled in fine dried bread crumbs. Fry in deep fat and garnish as directed.

BATTERIES FOR BUSES
Wonderful claims are made for a new electrical battery which has been placed on the market by Messrs. Siebe Gorman, of London.

It is claimed that it is fool proof and indestructible; that it will not deteriorate with age, and that it has three hundred to eight per cent more capacity than any battery at present in use. Capable of being recharged in fifteen minutes by an extremely simple process, it possesses such chemical purity that no “local action” takes place. Consequently it can be left for years in any state of charge or discharge without ill effects.

It is said that vehicles equipped with this battery will have a radius of three hundred miles, against a fifty-mile radius of vehicles with other batteries of equal weight. When used as a starting battery for motor cars it will not only start the engine but drive the car for several miles.

Had you concluded that Hoozemans would never come bright, just try Blue Devil on it once.—Adv.

PUT UP EGGS NOW

FADS AND FASHIONS OF TODAY
By DOROTHY PHILLIPS
Popular Star of First National Pictures.

Rivalling in brilliant colorings, gay conceits of fabrics, and quaintness of design which characterize the spring millinery, an interesting avalanche of handbags, pocketbooks and vanity cases has descended upon the show windows of Fifth Avenue, and for the passerby to focus more than ordinary attention upon this formerly merely utilitarian accessory.

While leather has not been altogether discarded and we find occasional glaucous kid pocketbooks of glossy reds, rich orchids, and a wide variety of pastel shades, silks, satins, ribbons and Milan straws predominate. Obviously their designers are trying to launch the extravagant mode of a pocketbook to match every look—or hat—for these are decidedly automatic affairs which would not with anything except the one shade or line which would harmonize with their individualities.

Three of the dressier models are shown in the sketch. The afternoon bag in the upper left hand corner is arranged by means of fast loops of two-toned picot-edged ribbon overlapped and finished with a motif of ribbon flowers in the center. In the lower left is an oval design made of brocade ribbon in a gorgeous Oriental rug design, and on the right plain satin ribbon flanks the gorgeous metallic brocade. For theatre and restaurant use are the last two mentioned, and should be selected with care. The evening bag is a novel idea, this of getting a hat to match our hand bag, but really these are such smashingly stunning things, and are so useful for holding a complete equipment of toilet requisites, and so on, that they have earned their supremacy.

A well known screen star dropped into the Ambassador at the tea hour the other afternoon carrying a graceful black moire vanity bag which was attached to her wrist by means of a bracelet strap composed of brilliant rhinestones. It was a dainty little affair, which looked as if its mission was more for ornament than utility. However, during the hour while we chatted over our Orange Pekoe, it was opened several times and quite a miscellaneous assortment of contents extracted an address book—a sample of silk—a letter—a beauty box—a variety which rivalled in volume that of a little boy's pockets; yet it kept its slim lines staunchly by means of a lining of tant chambray skin, silk covered.

FADS AND FASHIONS OF TODAY

By DOROTHY PHILLIPS
Popular Star of First National Pictures.

There is nothing which so improves some salads, meats and sauces as garlic. But it must be used with discretion, and that means one of the several sections found in a garlic. One of these sections, which should be peeled, cut into halves and rubbed over the bowl in which a salad is served will give just that unusual and delicious flavor so often lacking.

Celery comes next, perhaps, and the root, stalk, tender leaves and seed are all used for seasoning. The celery root, or “celery,” is used in soups and salads or when creamed as a vegetable.

Parsley Used.
Then comes parsley, which should be used quite as much as a seasoning for a garnish. When parsley is plentiful in the summer it may be dried and kept for winter use. If dipped in boiling water and then in cold water before drying the color is retained.

The leaf of the laurel or bay tree is an excellent aromatic seasoning, but if used too plentifully overpowers the other flavors. For the ordinary amount of meat or sauces a “bit” of bay leaf is sufficient and by “bit” is meant a small piece not more than a quarter of an inch long.

Whole pepper, or peppercorns, are much better to use in cooking than ground pepper. From three or four to half a teaspoon is the usual quantity to be used. A slight flavor of nutmeg in cream soups or chicken dishes is best obtained by cooking a “blade” of whole mace in the stock, or scalding it with the milk. A “blade” of mace is not much larger than a “pin,” about one inch long.

Whole cloves, never more than one or two, are an improvement to tomato sauce and soup. It should be remembered that these spices ought to be cooked only for a short time in the sauce or with the meat, as too long a cooking will develop a strong flavor.

Fried Onions.
Frying onion in the fat, before adding the liquid, gives a much better flavor to a sauce or gravy.

LARGEST CAMERA FOR GEOGRAPHICAL MAPS
What is declared to be the largest camera ever constructed is being used by the U. S. Geological Survey Bureau in copying intricate and complicated geological maps, thousands of which are prepared by the department every year. The work requires absolute accuracy and veracity to detail and ordinary cameras have been unsatisfactory in copying the maps because of the fact that they are not absolutely rigid. With the ordinary camera, too, problems of alignment and focus, present themselves, since no two photographs, even focus exactly alike, due to the differences in their power of vision. To overcome all these defects, experts of the Geological Survey, spent three years in experimenting before they finally produced a rigid aerial camera which answered every demand in the accurate reproduction of complex geological maps.

This monster camera is made entirely of steel, except, of course, the bellows, which is of rubber. It weighs three and a half tons, is operated entirely by electricity, has a lens of forty-two inches focal length and can take a picture of a vast square. The camera cost approximately \$1,000 and has enabled the Geological Survey Bureau to turn out the finest reproduction of geological maps ever made.

JOHN C. BURNS FRUIT HOUSE

THERE'S MORE SEASONING THAN SALT AND PEPPER
By BERTHA E. SHAPLEIGH
Of Columbia University.

The people of ancient days used more seasoning in their food preparations than we do, and some of their seasonings are not appealing to our sense of taste—assafetida, for instance. The supposition is that, because they had no refrigeration, meats spoiled readily and some of the very highly flavored ingredients were added to cover up the taste.

But let us consider some of the seasonings besides salt and pepper, which the housewife should have on her shelves, and thus add much variety, as to flavor, in her daily menus. First of all vegetables comes the onion, and its relations, the shallot, garlic, chives, and leeks.

There is nothing which so improves some salads, meats and sauces as garlic. But it must be used with discretion, and that means one of the several sections found in a garlic. One of these sections, which should be peeled, cut into halves and rubbed over the bowl in which a salad is served will give just that unusual and delicious flavor so often lacking.

WISCONSIN INDIAN WOMAN MAKES WAR UPON U. S. BUREAU

Begins Campaign for Abolition of Board Handling Indian Affairs

(Tribune Washington Bureau)

WASHINGTON.—Mrs. Leta Myers, a woman of Wisconsin, for many years a leader in championing the cause of all the Indian tribes of America, has returned to Washington to continue her efforts in behalf of her people. Recently she visited the Department of the Interior in connection with her mission, taking with her the first red-skinned, black-eyed baby born to her in the Indian country five and a half months ago.

"I have given up trying to help the Indians financially and will endeavor solely to work for their political betterment," Mrs. Myers said. "I shall urge that the Bureau of Indian Affairs be abolished, and that the Indian tribes be placed under the direct supervision of the United States Senate, which will lead to the early abandonment of this useless and unjust branch of the government."

Mrs. Myers, until coming to Washington, acted as secretary of the United States Agency of the Bureau of Indian Affairs, a position which she held for several years.

"I believe the Indians are a fair people, and I am sure they will be able to take care of themselves if they are given the opportunity," she declared.

"The Indian population is beginning to realize that the day is coming when they will be able to take care of themselves, and I believe they will be able to do so."

"I believe the Indians are a fair people, and I am sure they will be able to take care of themselves if they are given the opportunity," she declared.

"I believe the Indians are a fair people, and I am sure they will be able to take care of themselves if they are given the opportunity," she declared.

COUNTY CHURCH NOTES

Church services will be held at New Amsterdam, Holmen and Mindoro by the Rev. J. Kroonmeyer, pastor, as follows:

New Amsterdam—The Sunday school and preaching services will be held Sunday in the afternoon, Sunday school at 2 p. m. and preaching at 3 p. m.

Holmen—Presbyterian church services in the town hall next Sunday evening at 7:45 p. m.

Mindoro—Mindoro Presbyterian church services next Sunday in the morning, Sunday school at 10 a. m. Preaching at 11 a. m.

BYRAM DECLARES ROADS ARE STARVED

MADISON, Wis.—By The Associated Press.—Failure of most of the railroads to make enough net income to maintain a surplus for credit needed for improvements is the most serious feature in railroad transportation today, President H. E. Byram of the Chicago, Milwaukee & St. Paul railroad declared in an address before the Commerce Club of the University of Wisconsin.

"I believe the railroads of today as a whole are an example of clean and efficient administration, free from the taint of individual profiteering," he declared.

"The railroads are unfavorably criticized because of alleged inefficiency and also for their inefficiency. They are hated by some because they do not more vigorously try to reduce wages so that the rates may be further reduced, and by others they are attacked because they do not try to burden the public with still greater payrolls."

"To keep the transportation machine abreast of the country's business development, terminals must be expanded and side tracks added from year to year in addition to the acquisition of new equipment. Shippers would not be benefited by the addition of more cars without corresponding increase in yards and side tracks. Shops and engine houses must also be expanded and adequate machinery and tools installed."

Florida man saved twice from drowning himself would try boating.

LOTS A BAKERS TO COMPETE FOR FAME WITH NOTED BUNN

WASHINGTON, D. C.—Bunn, the baker of Baraboo, once famed in poetry and prose, may have been Wisconsin's most famous baker but there were 552 others each manufacturing more than \$5,000 worth of bread and other bakery products in 1921, the department of commerce announces.

In the entire nation the value of products of establishments engaged primarily in the manufacture of bread and other bakery products amounted to \$1,089,759,000 in 1921 as compared with \$1,151,506,000 in 1919, and \$491,803,000 in 1914, a decrease of 6 per cent from 1919 to 1921, but an increase of 122 per cent for the seven-year period, 1914 to 1921. In addition, bread and other bakery products were also reported as subsidiary products by establishments engaged in other industries to the value of \$8,292,000 in 1921, \$10,102,000 in 1919, and \$4,135,000 in 1914.

This industry includes establishments manufacturing as their product of chief value all kinds of bread, pies, cakes, biscuits and crackers.

ITALY SOWING MORE WHEAT

ROME.—An area of 11,614,000 acres in Italy has been sown with wheat, according to a recent report of the International Agricultural Institute. The number of acres sown a year ago was 11,401,000, and they yielded a record crop.

AMERICAN MINERS OFF FOR RUSSIA FLY RED SOVIET FLAG

NEW YORK.—The red flag of the soviet was hoisted over the United American Miner Reliance Tuesday by 25 American miners who sailed with their wives and children for Russia to work in the mines of the autonomous industrial colony, Kuzbas. An interested spectator to the ceremony from a distance was Victor Berger, socialist member of congress from Milwaukee, who sailed on the Reliance to attend the international congress of socialist at Hamburg.

STEEL PRODUCTION DROPS

WASHINGTON.—The department of commerce announces that, according to reports made to the bureau of the census, the value of products of establishments engaged primarily in steel production and the rolling of iron and steel products amounted to \$1,481,659,000 in 1921, as compared with \$2,328,902,376 in 1919, and \$918,664,565 in 1914, a decrease of 48 per cent from 1919 to 1921, but an increase of 61 per cent

EXTREME YOUTH MAY SAVE THIS BIGAMIST

CHICAGO, Ill.—The youth of Norman Grautham, aged 17, won for him a continuance Tuesday when he faced Judge Hannan charged with having two wives. The first wife, married a year ago, is 21, and the second wife, who brought the complaint, is 23. The judge indicated he would investigate the validity of the marriages in view of Grautham's youth.

URGE WORLD PISTOL BAN

NEW YORK.—An international agreement between nations to restrict the manufacture and sale of firearms was recommended by police heads from all parts of the world at the international police conference.

IMPORTANT: OVER \$7500.00 for Grape-Nuts Recipes

The Postum Cereal Company will buy not less than 101 Recipes or suggestions for new Uses of Grape-Nuts, paying \$50.00 for each one accepted. And in addition—

Good Housekeeping Institute, conducted by Good Housekeeping Magazine, will decide an award of \$2500.00 for the best four of the 101 or more Recipes or suggestions for new Uses of Grape-Nuts, so purchased:

\$1000.00 for the 1st selection \$750.00 for the 2nd selection
\$500.00 for the 3rd selection \$250.00 for the 4th selection

Read carefully the terms of this offer so that you may have the fullest opportunity to share in its benefits. The conditions are so simple and fair that every housewife in the United States can take part in this National Recipe Festival!

There Is No Other Food Like Grape-Nuts

WHILE practically every man, woman and child in the English-speaking world knows Grape-Nuts as a delicious, nourishing and wholesome cereal, and while it is common knowledge that Grape-Nuts with milk or cream is a complete food, many housewives do not know of the appetizing and economical dishes that can be prepared with Grape-Nuts. It lends itself, we believe, to more uses than any other cereal. The convenience and economy of Grape-Nuts, and the flavor, zest and wholesomeness which it imparts to other food, make it invaluable in every home.

Frequently we receive interesting letters from women throughout the country, telling about the attractive dishes they make with Grape-Nuts—delicious puddings, salads,

dressings for fowls, etc. No doubt there are thousands of women who are finding varied uses for Grape-Nuts in their home cooking, and even more thousands who will be glad to learn of those varied uses; for while we all cling to old favorite dishes, we also welcome and enjoy a change.

So that is the thought back of our offer of more than \$7500.00 in cash for new ways of using Grape-Nuts. To those women who are already using Grape-Nuts in various ways, other than as a breakfast cereal or in the recipes given here, and to those women who would like to try their hand at developing some new way to use Grape-Nuts, we offer to buy at \$50.00 each not less than 101 new Grape-Nuts Recipes. We plan to include these new Recipes in a beautifully illustrated cook book.

What Is Grape-Nuts?

Grape-Nuts is a highly nutritious food in the form of crisp, golden granules. It contains the full nutrition of wheat and barley, including vitamin-B and mineral elements required for building sturdy health. These elements are often lacking in the ordinary diet, chiefly through "over-refinement" in the preparation of food.

No other food is so thoroughly baked as Grape-Nuts. More than 20 hours are consumed in the baking process which makes Grape-Nuts easy to digest, and also develops a natural sweetness from the grains themselves.

The form and crispness of Grape-Nuts invite thorough mastication—a decided advantage because this not only provides proper exercise for the

teeth, but makes for good digestion.

Every housewife in the Land should take advantage of this extraordinary opportunity to earn the tidy sum of \$50.00 by a little pleasant and educational effort in her own home. Also the fair and equal chance to secure one of the liberal awards to be made by Good Housekeeping Institute.

Moreover, there's the greater knowledge of the value of Grape-Nuts, not only as a delicious breakfast cereal, but in the preparation of a variety of appetizing dishes that add to the health and pleasure of the whole family.

Where you don't find Grape-Nuts you won't find people

"There's a Reason"

Sold by grocers everywhere!

Conditions Governing the Purchase of, and Awards for Grape-Nuts Recipes

The Postum Cereal Company will buy not less than 101 Recipes or suggestions for new Uses of Grape-Nuts, paying \$50.00 for each one accepted. This offer is open to every person in the United States.

Good Housekeeping Institute, conducted by Good Housekeeping Magazine, will decide an award of \$2500.00 for the best four of the 101 or more Recipes or suggestions for new Uses of Grape-Nuts, so purchased. \$1000.00 for the 1st selection; \$750.00 for the 2nd selection; \$500.00 for the 3rd selection; and \$250.00 for the 4th selection.

Recipes must be mailed between May 1st, 1923 and August 31st, 1923.

Recipes or suggestions for new uses submitted for purchase must not duplicate any of the ten Recipes printed in this announcement.

No Recipe will be purchased from anyone directly or indirectly connected with the Postum Cereal Company, Inc., or Good Housekeeping Institute.

If more than one Recipe is offered, each must be written on a separate sheet. Write name and address plainly on each Recipe submitted.

In the event of a tie for any award offered,

an award identical in all respects with that tied for will be made to each one tying.

It is not necessary to purchase Grape-Nuts. A suitable quantity will be sent upon request to those desiring to submit recipes.

Your Recipe should state the exact number intended to be served. Recipes should be carefully tested to make sure that proportions and directions for preparing will bring best results.

Form of Recipe: First, write name of your Recipe at top of sheet; underneath list all ingredients, using level measurements only; then the directions for preparing, worded simply and accurately. Do not send specimen dish.

In considering Recipes for purchase, and for awards by Good Housekeeping Institute, account will be taken of the following points:

(a) Palatability.
(b) Simplicity and economy.
(c) Accuracy and clearness of expression of recipe.

Announcement of the Recipes purchased, and Awards by Good Housekeeping Institute, will be made in January Good Housekeeping.

Recipes submitted to the Postum Cereal Company for purchase will not be returned.

Below are ten Recipes showing a few of the many appetizing dishes that can be made with Grape-Nuts. Read them over, try some of them, and then you will find it easy to work out a new Recipe or think of a new use for Grape-Nuts, that we may purchase. And remember, your Recipe or suggestion for new use of Grape-Nuts may also merit one of the large awards.

GRAPE-NUTS Ice Cream
Prepare plain flavored ice cream in the usual way. Just before the cream hardens in freezing, add Grape-Nuts as it comes from the package, in the proportion of one-half cup of Grape-Nuts to one quart of ice cream. If you buy ice cream ready made, add Grape-Nuts in place of nuts. You will find the resulting flavor unique.

GRAPE-NUTS Salad
1 cup Grape-Nuts 2 cubed bananas
1/2 cup orange 2 teaspoons lemon juice
1/2 cup cubed pine-apple Green Salad Dressing
Cut up the fruit, add lemon-juice, mix with Grape-Nuts, and serve on bed of lettuce with Cream Salad Dressing. Makes four to six portions.

GRAPE-NUTS Six Minute Pudding
1 cup Grape-Nuts 1 tablespoon sugar
1/2 cup scalded milk 1/2 cup raisins
Cover Grape-Nuts with scalded milk, add sugar, raisins, and a little nutmeg. Cook six minutes directly over the heat, stirring constantly, and serve with any good pudding sauce. Makes four to six portions.

GRAPE-NUTS Cookies
1 cup Grape-Nuts 2/3 cups flour
1/2 cup shortening 2 teaspoons baking powder
1/2 cup light brown sugar 1 teaspoon cinnamon
1/2 cup milk 1/2 teaspoon cloves
2 well-beaten eggs 1/4 teaspoon salt
Cream shortening and sugar. Add milk and well-beaten eggs. Add well-sifted dry ingredients, and mix until dough is stiff. Roll into balls, and then the Grape-Nuts. Bake thoroughly and drop from a spoon on baking sheet one and one-half inches apart. Bake in a moderate oven for fifteen minutes.

GRAPE-NUTS Cheese Casserole
1/2 cup Grape-Nuts 1/2 teaspoon pepper
1/2 cup milk 1/4 cups chopped American cheese
1 tablespoon butter 2 eggs
1 teaspoon salt Few grains paprika
Blend the milk, Add Grape-Nuts, butter and seasonings and combine with the cheese and the latter slightly beaten. Pour into a buttered baking dish, surround with hot water and bake slowly for forty-five minutes in a deep oven. Serve as the main course at luncheon, supper, or a meatless dinner. Makes four to six portions.

GRAPE-NUTS Fruit Pudding
1 cup Grape-Nuts 1 pint boiling water
1 package lemon-Jell-O 1/2 cup seeded raisins or lemon-flavored or chopped dates
Add the boiling water to the Jell-O or lemon-flavored gelatin and stir until it is dissolved. Pour into a mold, and after the mixture has cooled slightly, add the Grape-Nuts and the fruit. Allow the mixture to chill and harden. Makes four to six portions.

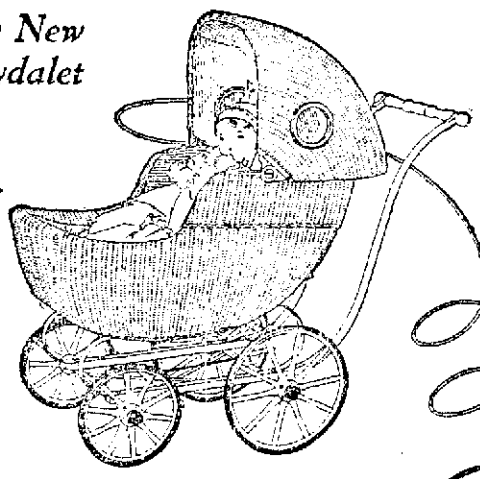

GRAPE-NUTS Meat Loaf
1 cup Grape-Nuts 1 egg
1 pound veal, mutton or beef 1/2 tablespoon lemon juice
1/2 pound salt pork 2 tablespoons tomato
1 teaspoon salt 1 teaspoon onion
1/2 teaspoon pepper 1/2 tablespoon chopped parsley
2 tablespoons milk 1/2 minced onion
Put the meat through a food chopper, add seasonings. Brown minced onion in a little fat before adding Grape-Nuts, milk, and slightly beaten eggs. Pack in a baking dish, surround with sliced baked bread and smooth evenly on top. Bake for forty-five minutes, basting frequently using one-half cup of hot water and allow to sit a time. Just before taking from oven brush with some of the beaten white of egg and a little milk. Brown for one minute. Makes four portions.

GRAPE-NUTS Loaf Cake
1 cup Grape-Nuts 1/2 cups Pease-flour
1/2 cup butter 2 teaspoons baking powder
1/2 cups sugar 1 teaspoon salt
1 egg 1 teaspoon vanilla
1 cup milk 1/2 teaspoon vanilla
Cream butter and sugar, add egg, vanilla, well-beaten; then milk and Grape-Nuts. Beat the mixture thoroughly, fold in alternately the sifted sugar and flour, and the vanilla. Bake in a loaf pan previously greased and lightly floured; bake three times; lastly, add the vanilla. Have all two-thirds full and bake in moderate oven for forty-five minutes.

GRAPE-NUTS Tomato Soup
1/2 cup Grape-Nuts 1 sliced onion
1 quart tomatoes 2 teaspoons salt
2 cups water 1/2 teaspoon onion
10 peppercorns 4 whole cloves
Cook tomatoes, water and seasonings twenty minutes; strain and add salt and soda. Crush the Grape-Nuts with a rolling pin. Melt the butter, add the rolled Grape-Nuts, onion and heat the soup to the boiling point. Substitute whole Grape-Nuts for tomatoes in serving individual soup plates. Makes four to six portions.

GRAPE-NUTS Fudge
1/2 cup Grape-Nuts 2 cups chocolate
2 cups granulated sugar 1/2 teaspoon salt
1 cup milk 2 tablespoons butter
1/2 teaspoon vanilla
Combine the sugar, milk, chocolate and salt; place over a slow heat, and stir constantly until the sugar is dissolved. Then continue boiling gently without stirring until the thermometer registers 234 degrees F., or the mixture forms a soft ball when dropped in cold water. Set the pan in bowl of cold water and allow to sit undisturbed until there is no heat in the fudge mixture. Remove and add the butter and vanilla. Beat the mixture until creamy and thick, then add Grape-Nuts and continue beating until enough to knead. Turn out on a buttered plate and cut into desired squares.

The New Lloydale

A Baby Carriage That Is Also a Stroller

You mothers know how rapidly baby outgrows his first carriage. This new Lloydale combines the baby carriage which he needs at first with the stroller which he requires later on.

It is wide and roomy; almost as spacious as the largest carriage, yet it is lighter and smaller than any baby carriage made. Mothers find it easier to handle; and apartment dwellers find its modest size very convenient.

Like all Lloyd Baby Conveyances, it is woven on the wonderful Lloyd Loom—of one fine, endless wicker strand—around and around, in a graceful bowl shape, flawless, smooth and strong. Because of this remarkable loom—the invention of Marshall B. Lloyd—weaving far more perfectly and thirty times faster than human hands, these beautiful Lloydalets can be bought for a lower price than has ever before been asked for a baby carriage of similar quality.

Ask your dealer to show you Lloydalets.

Pat. Process Lloyd Loom Products Baby Carriages & Furniture

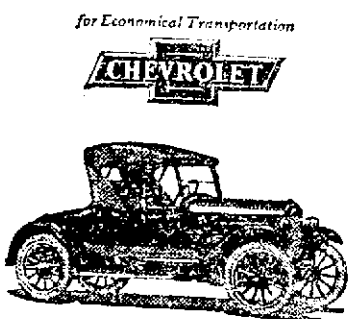

Ask dealers to show you beautiful Lloyd Loom Furniture made by the same process

The only carriage woven in desired shape from one endless wicker strand. Don't accept a substitute. Find the Lloyd name-plate on the seat.

THE LLOYD MANUFACTURING COMPANY (Hewitt-Wakefield Co.) Macomb, Michigan.

MILL CITY, DULUTH SINGERS COME HERE FOR CONCERT MAY 20

Minneapolis Glee Club and Duluth Normanna Male Chorus to Tour Europe

Plans have been completed by the Normanna Sangerkor of La Crosse for the appearance in this city on Sunday, May 20, of the combined choruses of the Minneapolis Glee Club and the Normanna Male Chorus of Duluth. One hundred male singers are appearing in this concert tour of both musical organizations. Concerts will be given in this city, Chicago and several eastern cities by the clubs on their way east to New York, whence they will sail to Europe for a concert tour of the continent. The clubs will arrive in La Crosse at 5 p. m., Sunday, May 20. A public reception has been arranged for them at the Chamber of Commerce. Mayor Verchota will welcome them to La Crosse. The concert will start at 8 p. m. in the La Crosse theater.

SPARTA DEATHS

SPARTA, Wis.—Mr. August Jankel died at his home on Pine street Tuesday morning at the age of seventy-eight years. He had been ill for a long period of time and a great suffering. Funeral services were held Sunday afternoon at the late home at two o'clock and at the Lutheran church at two-thirty o'clock. The pastor, Rev. Arthur Borg, conducted the services.

Mrs. Addie Jankel, who died in St. Mary's hospital, was taken to Calmar for burial and funeral services were held in the Methodist church at that place, Rev. Jankel officiating.

The funeral of Mr. and Mrs. William Martin died Sunday afternoon. The funeral took place in the Lutheran cemetery on Monday, Rev. Arthur Borg officiating.

John Gillingham, age twelve years, who died in St. Mary's hospital, was taken to Calmar for burial and funeral services were held in the Catholic church at Tomah, and interment was in the Catholic cemetery at Tomah.

British boys will be sent from England to Australia at the rate of \$30 a month if a scheme of enlistment recently launched by the Australian government proves successful.

DOERFLINGER'S RIPOLIN---

Where Cleanliness Counts

The charm of enamel paint—the real enduring charm developing through years—can best be realized by the use of RIPOLIN. The beautiful decoration of many of Europe's finest homes, most noted hotels, even of castles and palaces, was accomplished with RIPOLIN.

For RIPOLIN is the real Enamel Paint, which was discovered by Dr. Riep in Amsterdam over thirty years ago.

It is the enamel made in colors of a great variety and beauty, and tints of delicate hue. The most artistic, most charming effects are possible because the required degree of lustre is easily obtained, either with or without rubbing. Combinations of tints and different lustres makes RIPOLIN finished rooms ideal.

The uses of RIPOLIN are not limited, however, to interior decoration. The wonderful gloss finish withstands the elements and is constantly used for the greatest range of painting. Metal and wooden furniture, engines, railway coaches, motors, even bridges, yachts and ocean liners are made weather resistant and attractive with RIPOLIN.

DOERFLINGER'S PAINT DEPT.—BASEMENT.

Rebuild yourself in

Colorado

Invest a little time and money in yourself this summer. Get out doors in that clear, crisp, tonic air of the Colorado Rockies.

Fish in icy mountain streams; hike or ride horseback over wooded trails. Play golf or tennis. Or just loaf. Take a camera shot at mountain sheep, deer or elk. Camp in the open or live in luxurious hotels.

Make it a real vacation this year in the Colorado Rockies and you will come back "hitting on all six."

WOULD PUT PRISON IN CHARGE OF ALL AUTO LICENSE WORK

MADISON, Wis.—Believing that a saving of from thirty thousand dollars to forty thousand can be effected by removing the automobile license department of the secretary of state's office to the state's prison at Waupun, Senator H. A. Huber introduced a bill to accomplish this object Tuesday evening. For several years the state has been manufacturing its auto license plates by prison labor. These plates are shipped to Madison and from there mailed out.

Under the terms of the Huber bill the administration of all laws relating to the registration of motor vehicles is invested in the state board of control, acting through a superintendent of licenses at the state prison at Waupun. All plates as far as possible shall be manufactured and distributed at the state prison, the labor being performed by the prisoners.

KICKING 'ER ALONG is Poor Business—

THE pounding, thumping, knocking and mis-firing which inevitably follow the use of poor, cheap, carbon-producing, gasoline are sure to "raise Ned" with your car.

They can't help it—for car and truck motors are finely adjusted pieces of mechanism, built to convert even explosions of real gasoline into driving power, not to withstand the racking of imperfect explosions.

Unless you take a "childish" delight in shooting the chutes and bumping the bumps, you'll fight shy of the gasoline that fouls your spark plugs, pits your valves and scores your cylinders, but cling to the real gasoline that explodes cleanly and evenly and delivers power, speed and mileage without damaging your motor.

GENERAL PERSHING MAY PAY VISIT TO DOUGLAS THIS YEAR

Asks Congress Members to Visit
the State Camps With
Him

BY E. N. TIMMONS
(Tribune Washington Bureau)
WASHINGTON.—While no formal announcement has been made by General Pershing regarding his plans for the summer, it is known that he is contemplating an extended swing around the country at the time the training camps are in progress, and will visit as many of them as possible.

It is, therefore, possible that Gen. Pershing will visit Camp Douglas where the Wisconsin National Guard will be in training from July 14 to August 29. In all Gen. Pershing expects to spend about three months in travel about the various training camps.

Gen. Pershing in his capacity as Chief of Staff has already written a letter to all members of the Senate and House, inviting them to visit the camps during the training period this summer.

The letter went to Senator La Follette and other senators and representatives opposed to large National Guard as well as to those members who believe in a strong National Guard as a means of national defense.

Pershing Letter
The Pershing letter was as follows:

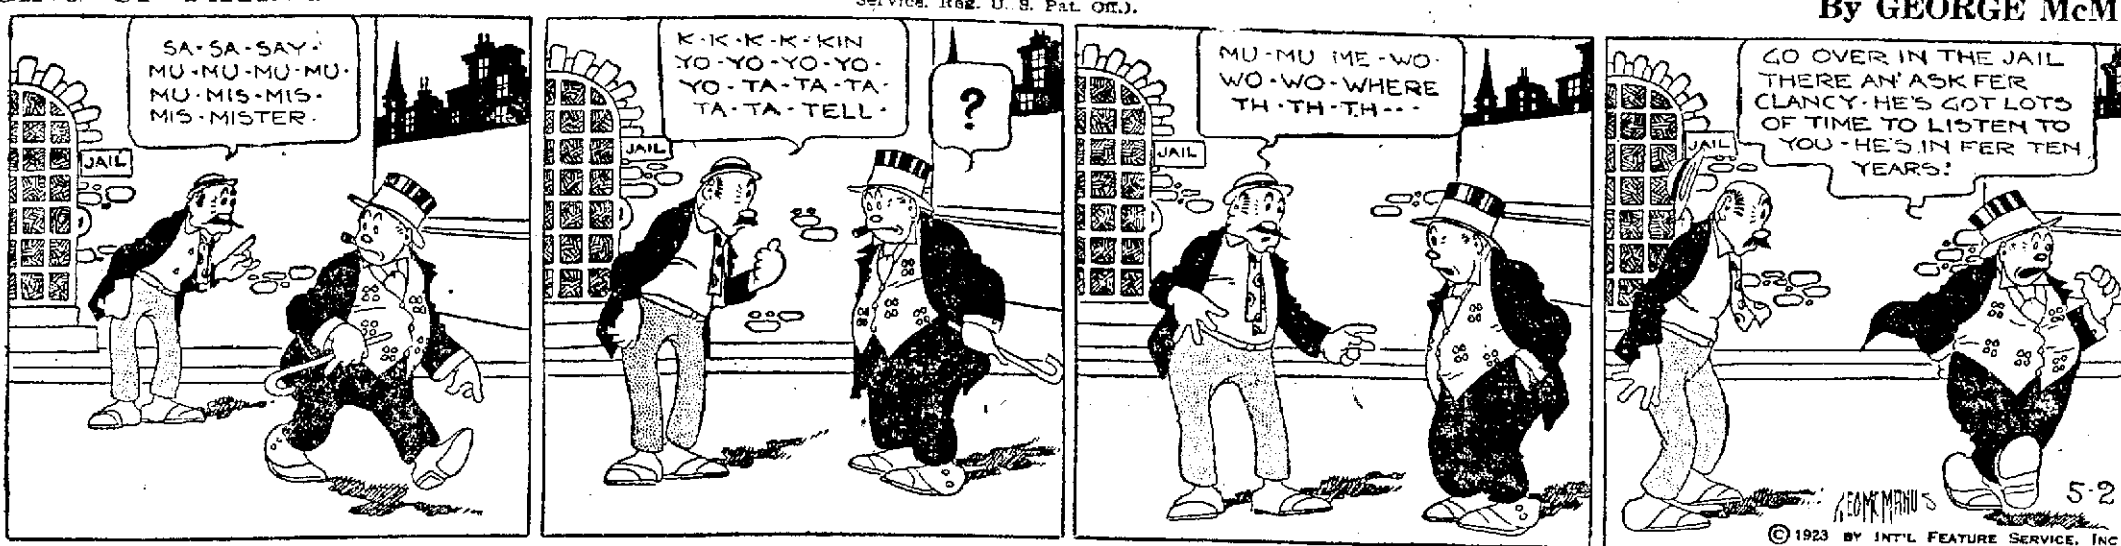

"I desire to extend to you a cordial invitation to visit one or more of the training camps to be carried on during the coming summer under the supervision of the War Department. It is sincerely hoped that you will find it convenient to take advantage of this invitation for it is thought that your presence will be much appreciated by the young men attending the camps and also that it will be interesting to you to observe what is being accomplished by the training being carried on.

The campaign will be of quite a varied nature, at some the National Guard will be under training, at others, the organized reserves, at others the young men from schools and colleges comprised under the title of the Reserve Officers' Training Corps, and at still others young men from all walks of life, known as the citizen military training camps. The instruction will be adapted to the requirements of each of these categories and, for the last two, will include not only physical discipline and basic military training, but also talks and lectures and quizzes on good citizenship, its rights, duties and responsibilities."

Fight For Guard
Never before has the War Department been so anxious to aid the National Guard training as now. The attack on the National Guard in Wisconsin has served to cause the Department to rally around it and its loss in the Budget state will aid it in other states.

Each reserve and National Guard officer in the War Department con-

BRINGING UP FATHER—

eral staff has been made a member of the "National Guard and reserve committee," and is charged with passing upon questions in which their organizations have a natural interest at the time the same problems are being considered by the staff.

This new duty of reserve and National Guard officers in the War Department is outlined by Col. L. D. Sasser, secretary of the General Staff, in a memorandum just issued.

"It is expected," the memorandum says, "that reserve officers will consult freely among themselves about their work, to the end that by comparing local difficulties and viewpoints, solutions may be reached, and the requirements of all parts of the country. The meetings of the friends and relatives of the men being National Guard and reserve commit-

tee will give an opportunity to gain a consensus of opinion as to various questions under study in particular divisions of branches of the general staff; while important problems may be formally referred to the committee to insure getting this composite point of view."

To Entertain Friends

Army officers have been given to understand that an important part of their summer training program, whether it be in connection with the regular military training camps, the Reserve Officers' Training Corps, or the regular forces, will be to entertain their friends and relatives of the friends and relatives of the men being trained. It is the intention of the

War Department, in this connection, that every facility be given to visitors.

A suggestion that has found favor with the War Department executives calls for a "Home Folks day" at the training centers, to be held probably near the conclusion of the instruction period, when a review can be held for the visitors and followed later by a barracks dinner with mess equipment for all. Other novel ways to stimulate interest among civilians and give them an accurate account of Army life are expected to be devised by officers in charge of the training centers in the various localities throughout the country.

NEW ENGLAND HAS HEAVY LOSS FROM SPRING FRESHETS

BOSTON, Mass.—Several million dollars damage has been caused by freshets in New England in the last two days and the situation is still serious. Rivers are swollen by continued rains and fed by melting snow in the mountain districts. Thousands of persons have been thrown out of work by the flooding of mill property. Total loss of the League of Nations last year was more than \$5,000,000.

GET REFUND ON CASHTON MILK RATE

WASHINGTON, D. C.—The interstate commerce commission has ordered reparation paid to the Borden Sales by the director general of milk roads for unreasonable rates on evaporated milk in carloads from Cashion, Wis., to New York city in 1919. The amount of the reparation is to be established, but is the difference between 60.5 cents and 55 cents per hundred pounds on the shipment.

MORAL CONDITIONS IN CITY BETTER CHURCHES TOLD

B. S. Steadwell Recalls Old Days
of La Crosse in Speech at
Federation Meeting

That La Crosse, despite many irregularities, is yet vastly better than it was a generation ago was the statement at the monthly meeting of the La Crosse Federation of Churches at the Y. W. C. A. on Monday, by B. S. Steadwell, executive head of the World's Peace League.

In his talk he said that while moral conditions here are not ideal at the present time, there has been a decided improvement since the days of the lumber mills. He recalled those earlier days when he said that there were 152 saloons in the city, 15 immoral houses with 40 inmates and three prosperous public gambling houses.

Reviews Old Days

In those times, said Mr. Steadwell, there were nights when the streets in the vicinity of these places were clogged with staggering masses of profane humanity. Today, the speaker continued, there are a few blocks on Pearl street which still recall that degenerate time, but the problem is not now one of purely commercialized vice, but one of an indifference on the part of the citizens and public officials to the whole matter of law enforcement.

Mr. Steadwell went on to say that "the personal liberty bug" has infected and debauched the public conscience in morals much more than it has in other lines of government. People, he said, submit willingly and intelligently to the regulation of habits in sanitation and hygiene, but are sluggish and careless in overlooking the contaminations and infections which go along with vice and immorality. It is only when the shock of murder or the shame of disgraceful conduct are brought vividly before us that we awake for a brief moment to the value of law enforcement in the realm, Mr. Steadwell asserted.

Advocates Reforms

Mr. Steadwell called attention to the value of modesty among girls and chastity among boys, both of which he regards as wholesome checks upon the sensual tendencies of life. Perhaps, he said, the restraining effects of these natural restraints have been partially nullified by the styles of dress among women, the closer contact of sexes in business and in industry and the loose portrayals of domestic relations at the theaters, constant, systematic and

NORWAY CONDOLES WITH CONGRESS ON DEATH OF SENATOR KNUTE NELSON

WASHINGTON.—An unusual communication, one of the few in American history, to be addressed directly to a branch of congress by a foreign nation, was presented by the Norwegian minister at the office of Vice President Coolidge. It was as follows:

"I have been instructed to extend to the senate of the United States the heartfelt sympathy of the Norwegian nation on the death of Senator Knute Nelson. The Norwegian nation has followed with the keenest interest the wonderful career of this Norwegian boy who rose to the foremost positions in the country which adopted him as one of its own sons. Always faithful to his country of adoption, he never forgot the land of his birth."

regular surveillance over all resorts and amusements places in order to strengthen and purify the medieval moral standards of the city were what he advised together with sympathetic co-operation with and support of public officials who are charged with responsibility along this line.

SPERRY SETS LOW POWER AIR MARK

DAYTON, Ohio, April 25.—Flying 25-miles against a 19 mile wind with his motor developing less than 15 horse-power, Lawrence Sperry arrived at Dayton Monday night after a four-hour flight from Washington, D. C. Twenty-five horse power had previously been required to keep a plane in the air, Sperry flew a Sperry Messenger, the smallest ship ever flown successfully.

SURVEY MILK USAGE IN FOREIGN LANDS

WASHINGTON.—In view of the constant and increasing exports of American malted milk and malted milk products, the foodstuffs division of the department of commerce has conducted a survey covering the uses of malted milk in a number of foreign countries. This survey covers the production, consumption, and factors affecting the sale of American product. Experts wishing to consult these reports may do so by communicating with the foodstuffs division of the Bureau of Foreign and Domestic Commerce and specifying the countries in which they are interested.

CHEMICAL TRADE BETTER

WASHINGTON.—The department of commerce today announced that reports made to the bureau of the census show a considerable decrease in the activities of the establishments engaged chiefly in the manufacture of chemicals during 1921, in comparison with 1919. The total value of products reported amounted to \$300,768,000 as compared with \$574,411,930 in 1919, and \$158,574,992 in 1914, a decrease of 32

PROPOSE CHANGES IN "CO-OP" RULES

Market Department Asks Bills to
Improve State Regulations

MADISON, Wis.—Bills making minor changes in the marketing statute and accomplishing a partial revision of the co-operative law were introduced in the assembly Wednesday by the committee on agriculture at the instance of the department of markets.

The amending bill to the marketing law effects only changes of a technical nature in the wording of some of the sections.

The scope of the co-operative law is broadened to include any purpose for which incorporation is authorized by the general law and to confer upon co-operative associations all the power of ordinary corporations, except those which are expressly denied. The rule of apportionment of proceeds is simplified to provide that it shall be paid back to patrons in proportion to

their patronage, except for certain details which are made optional. Authority is given to a co-operative association to become a member of any non-capitalized corporation or association.

The attorney general is clothed with authority to enjoin any present partnership, corporation, trust or unincorporated association from using the term "co-operative" in violation of the statute.

The percentage of the membership which is demanded as a quorum is reduced from a majority to 20 per cent.

Forty unemployed ex-officers recently volunteered for work as bus conductors and drivers in London.

BEGGAR LEAVES GIFT

LONDON.—A beggar named Love, who has solicited alms for years in

Suffolk, has died and bequeathed a considerable estate to poor folk who befriended him.

A Warning of Interest to Women

ONCE and for always let the foolish rumor about white lead in face powder be dispelled from the mind of every woman.

No decent, honorable, or far-sighted maker of face powder will use white lead, nor will he, if truly reputable, accuse others of its use. White lead is injurious and no manufacturer who used it could remain in business.

Suggestion of white lead in face powder comes only from jealous minded makers or sales persons. Nobody ever writes, prints or publicly makes this suggestion. The charge, if and when made, is for the sole and only purpose of striking an unfair blow at a meritorious, widely sold article.

Armand Cold Cream Powder contains no white lead. Neither do twenty-five other face powders which we have caused to be analyzed by a chemist of unquestioned ability and integrity.

Armand Face Powders contain no ingredient injurious to the skin, no matter what quantities of the powder may be applied.

Armand welcomes any investigation of these statements. The facts are published gladly for the benefit of the face powder industry, and to inspire confidence on the part of the women of the world, in this industry.

Information that any person has made the statement that Armand or any other good face powder contains white lead will be appreciated by The Armand Company.

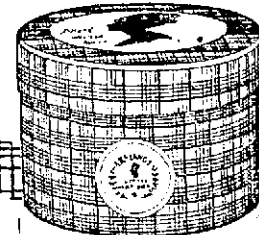

Armand Cold Cream Powder with its cold cream base is unlike any other face powder. It produces a clinging, soothing, satisfying effect. It is sold all over the world in the little Pink-and-White Hat-Box at \$1.00.

SILENT NIGHTS IN RADIO BIG AID TO DISTANCE HEARING

Chicago Inaugurates a Plan
Whereby Locals Stations Re-
main Silent One Night a Week

CHICAGO.—"Silent nights," when local radio stations broadcast the program inaugurated a week or so ago, have resulted in many reports of long distance reception according to a compilation of reports made here recently. Monday nights were temporarily adopted by the Chicago broadcasters for the experiments in response to many requests from radio fans for a "silent night" and will be continued, it was said, unless the popular demand wanes.

A town where only "silent nights" be adopted by broadcasting stations is a sign of the country has been discussed following the inauguration of Chicago's silence. Under this plan stations in a certain district would broadcast on Monday night, another district would not send on Tuesday night, and so on throughout the week. It was pointed out that in this way the entire country would have a silent night once a week.

Object to "silent nights" has been raised by radio fans owing to the fact that stations, which ordinarily are capable of receiving telephone signals for a distance of only 25 miles, it is estimated that from one-third to one-half of the radio phone receivers in Chicago use crystals. Only receivers using vacuum tube detectors are capable of long distance reception.

Inauguration of "silent nights" has brought prominently to the radio fan's attention the phenomenon of "fading" encountered only when listening to far away stations. "Fading," for which radio experts say there is no present remedy, it was explained, caused the received signal to become so faint as to be almost unrecognizable. A station may be picked up with the voice or music of a far station, but as it begins to fade, the sound becomes so faint as to be almost unrecognizable. Several theories have been offered in explanation, one of them being that some atmospheric condition absorbs the energy being sent out by the broadcaster.

DOG, HIS MASTER DEAD, KEEPS VIGIL AT "ROCK OF MOURNING"

NEWARK, N. J.—Doggedly, stolidly, a Newark collie keeps a daily rendezvous with death.

Each morning he jumps on a rock in Weequahic Park, whines mournfully, and holds his vigil until nightfall. Then he slinks away, disappointed.

For his little master will never come again. Rex, the faithful dog, and little Bob Johnson were inseparable. They played together for years.

Then, last February little Bob tried to climb the big rock in the park. Rex was with him, but couldn't help him much. The boy slipped, fell, fractured his skull and died in the city hospital soon after.

The dog couldn't understand why his master stopped coming. He went out and looked but couldn't find him.

So he keeps on waiting at the place he last saw him. Sometimes he has to fight for his place. But the other dogs always gets licked. The last one, a terrier, was so badly worsted that he had to be taken to a veterinarian.

Since then the other dogs of the park seem to respect Rex's Rock of Mourning.

But they haven't been able to make the collie give up his watch. He's still waiting for little Bob.

EXPLAINS METHODS BY WHICH CLOUDS ARE DRIVEN AWAY

Artificial Rain-making and Dis-
sipation of Fogs Possibil-
ity Says U. S. Chemist

WASHINGTON.—Rain-making and the dissipation of fogs and clouds by a process invented by Dr. L. Francis Warren is a scientific possibility, and the further perfection of apparatus no doubt will prove its feasibility, said Dr. R. B. Moore recently to The Associated Press. Dr. Moore is chief chemist of the United States Bureau of Mines. While he has not yet had opportunity to see Dr. Warren's apparatus in operation, Dr. Moore has been interested in the method since its inception and has had faith in the soundness of the scientific principle on which it is based.

The rain-making method consists in charging a dielectric material that retains an electric charge such as fine sand, with a static charge, and then sprinkling this sand over the top of a cloud by means of an airplane," said Dr. Moore. "As everyone knows, clouds consist of minute particles of water, a large proportion of which are charged. All the particles in the same cloud are charged either negatively or positively and, therefore, as they carry the same sign they repel each other when they come into too close contact. This militates against the coalescence of the particles into a size that allows them to fall through the atmosphere in the form of rain. Anything which will

dissipate the charge on the particles will help coalescence and therefore, will assist in precipitation."

"I have had no opportunity for personal observation," Dr. Moore continued, "in connection with the tests already made, but I have read the affidavits of the observers. From these it appears that a single airplane has been able to dissipate a cloud a mile or two long and over 1,000 feet deep in a few minutes by using about 100 pounds of charged sand."

"The apparatus which Dr. Warren uses for charging the sand is not by any means perfected, and he is able only to get 12,000 or 14,000 volts on the particles," Dr. Moore continued. "In addition it has not been possible, so far, to charge more than a small proportion of the sand grains. I see no reason why the voltage cannot be increased, with improved apparatus, up to 30,000 volts or even more, and also why the percentage of charged grains cannot be greatly increased. Under such conditions a still greater effect should be obtained with a given weight of sand."

The work is still in its initial stages and it is difficult to state definitely its future possibilities. No trials have been made on fog, as conditions have not been favorable for an airplane to go up in a fog and make the test.

Fogs are a combination of mist or clouds in contact with the earth, mixed with more or less smoke. Whether it will be more difficult or easier to get rid of such fogs than has been the case with clouds high up in the air is yet to be determined, but the methods certainly show great promise and justify complete investigation by a satisfactory series of trials with improved apparatus. If fogs can be dissipated, the result would be of tremendous value to cities such as London and San Francisco, besides being of great advantage

to the air service in connection with its flying fields."

TO CHOOSE BISHOP FOR MICHIGAN DIOCESE

DETROIT, Mich.—A special convention of the Michigan diocese of the Protestant Episcopal church will assemble here May 15 to select a successor to the late Bishop Charles D. Williams. Of five bishops and a dozen priests the one whose name is most frequently mentioned is Right Rev. Henry St. George Tucker, until recently bishop of Kyoto, Japan. During the war he worked in the American Red Cross in Siberia and held the rank of major.

COLLEGE BOY PITCHES 'NO MAN TO FIRST' GAME

ATHENS, Ga.—Fred Sale, diminutive righthander of the University of Georgia, pitched a perfect game against the University of Virginia here Monday afternoon. Not a man hit safely, not one reached first base and only twenty-seven men faced him. Georgia won the game 4 to 0. Sale is a second year man on the Georgia team. His home is in Atlanta. Other no hit games have been hurled, but never before probably has the feat of no man to first been attained.

BRITISH LABOR M. P.'s DINE WITH PRINCE

LONDON.—Labor leaders in the house of commons have accepted an invitation of Lady Astor to attend a dinner party May 1 to meet the Prince of Wales.

SENATE COMMITTEE AGAINST WETS ON SEARCH MEASURE

MADISON, Wis.—Wet legislation suffered another setback at the hands of the senate Tuesday when the state affairs committee reported unfavorably the Sachtion bill restricting the search and seizure clause of the Severson prohibition law. Senators Tirus, Loeche and Smith were against the bill, and Senators Gottelman and Bilgram for it. The vote was taken after a hearing during which the alleged merits and demerits of the eighteenth amendment were given another thorough airing.

Experiments are being made in using garbato to produce steam for heating.

IRON RANGE MINERS GRANTED PAY BOOST

IRONWOOD, Mich.—Officials of the Oliver Mining company, a subsidiary of the United States Steel corporation have received notice that a ten per cent increase in miners' wages was effective Tuesday. The Oliver Iron Mining company operates about one-fourth of the mines on the Gogebic range.

Mining company, both large operators, also plan an increase.

Mine officials attribute the increase to the recent rise in ore prices and the cut of 15 cents per ton in freight rates to the docks. There is a considerable shortage of labor.

Cement Starts Things— and Keeps Them Going

Scores of industries keep producing armies of workmen are kept busy, to supply demands arising from the use of portland cement.

Unlike most common articles, cement not only starts things but keeps them going. On every construction job it creates demand for an almost immeasurable volume of other essential materials and services.

Just take the one most closely related class of these—sand, gravel, crushed stone—the "aggregate" for concrete. Simply to get these out of the earth and prepare them for use during the season of active demand, requires the employment of at least 50,000 men.

Hundreds of thousands more are engaged in concrete work on construction jobs.

One would hardly think that the water in concrete amounted to much. Yet more had to be pumped or measured for this purpose last year than was used altogether in Duluth or Fort Worth.

Transporting the cement and "aggregates" for concrete keeps more locomotives and freight cars busy than there are on the New York Central Railroad.

And those engines burn coal, 6,500,000 tons a year, as much as 6,500 miners take out.

And so the list might be lengthened indefinitely.

The cement industry depends on a great number of other industries. They also depend on it. In a very real sense, these are all one industry.

BIG EXPANSION IN INDUSTRIES OF U. S. SHOWN IN REPORT

Total Value in Some Instances as Much as Four Times as Great as in 1914

WASHINGTON.—By the Associated Press.—Enormous expansion in American industries since the war period is indicated by the value of their products in 1921 as compared with the value in 1914. The total value for some was quadrupled, for others tripled and for many doubled in the seven year period, according to preliminary statistics of the 1921 census of manufacturers now being made public by the census bureau.

Figures for more than half of the country's 550 classified manufactures completed to date place their total value in 1921 at \$62,118,078,773, an increase of \$28,171,644,019 over 1914. Compared with the high price period of 1919, many industries show a decrease in the value of their 1921 output from that year, due largely to the decline in prices.

Among industries whose output more than quadrupled in value in the seven year period from 1914 to 1921 were the manufacture of rubber tires, tubes and other rubber goods; petroleum refining, and manufacture of asbestos products. Those whose production values more than tripled included manufactured fuel, ice cream, pocketbooks, automobiles, automobile bodies and parts, baking powders and yeast, and chemical fire extinguishers.

Some industries showed a decrease in the seven year period. These included manufacture of ice cream, carriages and wagons, leather and plumes, leather belting, mail, saddlery and harness, and wood engraving.

The total value of products in 1921 for some of the larger industries for which statistics were announced and the percentage of increase over 1914 follows:

Industry	1921 Value	1914 Value	Percentage Increase
Petroleum refining	\$1,722,149,000	\$1,222,149,000	40.9
Automobiles	1,699,149,179	275,000,000	512.5
Food and kindred products	1,699,149,179	275,000,000	512.5
Textile mill product	1,699,149,179	275,000,000	512.5
Chemical and allied products	1,699,149,179	275,000,000	512.5
Iron and steel	1,699,149,179	275,000,000	512.5
Non-ferrous metal	1,699,149,179	275,000,000	512.5
Stone, clay and glass	1,699,149,179	275,000,000	512.5
Paper and allied products	1,699,149,179	275,000,000	512.5
Transportation equipment	1,699,149,179	275,000,000	512.5
Electric, electronic and optical apparatus	1,699,149,179	275,000,000	512.5
Armaments	1,699,149,179	275,000,000	512.5
Other manufactures	1,699,149,179	275,000,000	512.5

"MINNESOTA DAY" SATURDAY AT UNIVERSITY OF WISCONSIN; TRACK AND BASEBALL TEAMS WILL MEET

MADISON, Wis.—Saturday, May 12, will be "Minnesota Day" at the University of Wisconsin, at which time the University of Minnesota basketball and track teams will meet the guests of Wisconsin and will meet the Badger teams in intercollegiate competition at Camp Randall.

The Universities of Wisconsin and Minnesota are closer than those of any two other universities in the conference so far as athletics is concerned, meeting each year in more branches of sport, including football, basketball, baseball, cross country, track, swimming, wrestling, tennis, golf, hockey and skiing and an effort is now being made to schedule a crew race.

The two institutions have much

in common and the sportsmanship displayed by the students of each institution at the various intercollegiate contests has often been the source of much favorable comment. Last fall Wisconsin played the Home-Coming football game at Minneapolis and next fall Minnesota will be the opponent of the Badgers at the Home-Coming game in Madison, but this spring the first "Minnesota Day" in the history of the two institutions will be observed at Madison and arrangements are being made to give the visitors a royal welcome.

Both the baseball and track teams are believed to be about evenly matched and the largest crowd of the season is expected to witness the two events.

FOUR FORFEITED GAMES IN ELKS' LEAGUE TUESDAY

The Kanabos, Tigers, Badgers and Buffaloes won by forfeit from the Elephants, Hippos, Beavers and Graffes respectively in the Elks' bowling league at the Arcade alley Tuesday night. The Wolves took three straight from the Goats and the Rabbits won two out of three from the Gophers.

STUDENT'S SKELETON CHEMICALLY TREATED DOCTOR DISCOVERS

Asserts It Is Well Preserved
Despite Long Action of
Elements

EVANSTON, Ill.—That Leighton Mount, missing Northwestern student, whose skeleton was found weighted down with stones upon an old pier at the foot of Lake Street, Evanston, on Monday, was murdered and his body chemically treated to prevent early discovery, was the theory advanced Tuesday by Dr. George Tyson, family physician of the Mount family.

The doctor's statement was made after he had carefully examined the bones and after all doubt as to the identity of the remains was removed by positive identification of the teeth by Dr. F. R. Ivey, the former student's dentist.

Inquest This Morning

These two new developments promise to add new sensations regarding the mystery surrounding young Mount's death.

Both Coroner Oscar Wolff, who has announced he will take personal charge of the inquest, and Chief of Police Charles W. Leighton of Evanston, announced their firm conviction in the belief that Mount was slain and his body secreted under the flooring of the old pier to hide the crime, whether the result of an accident during a boxing ceremony or intentional.

Dr. Tyson said the bones are too well preserved to have lain under the pier subject to the action of the weather unless there had been some chemical applied. They are not decomposed, but are well preserved. Ordinarily human bones would have been decomposed long before this if subjected to the elements.

REVOKE LAY-OFF OF TAX BOARD AIDES

MADISON, Wis.—All of the work of the state tax commission will continue unhampered as a result of the commission finding that it has sufficient funds to operate all activities, in spite of the recent loss of an expected appropriation of \$17,000 by Governor Blaine. The executive was notified today that all orders for curtailing the work of the department had been cancelled.

Following is the letter of the tax commission to Governor Blaine:

"We take pleasure in advising you that the embarrassing situation that has arisen in reference to providing funds to meet the running expenses of the tax commission for the remainder of the fiscal year has been satisfactorily cleared up by the governor of state, as the following letter indicates." The letter itemizes an unpaid balance and some other claims which are expected to keep the department running.

NORMAL SCHOOL DOINGS

The men's club under the auspices of the Women's Athletic Association is conducting a singles tournament. Paul Tunn last two sets to Singer, while Norman Zolch lost to Roger McKee.

The first spring formal of the year will be given by the College Club Saturday evening.

H. C. Reuter, coach of the men's team, had a surprise on his shore for several members of the team when he gave out four certificates to Bobby Hupf, Stevenson, Tucker and Fellows for good work at the North western Gymnasium meet several weeks ago. Chester Wangenien was fifth place in the all events and received a bronze medal.

The Physical Education club held their regular business meeting Monday night. Mr. Wittich conducted several songs and Mr. Nahr, Mr. Reuter and Mr. Wittich gave talks on the recent National Physical Education convention at Chicago. It was decided to give a party and a formal dance sometime in May.

Jack Murphy, who was not expected back on account of the death of his father, made his appearance Monday and everyone was glad to see his fresh smile again. Jack will be here for summer school but will not come back next year.

MOVIES

"ROBIN HOOD"

It has often been contended that there was art in motion pictures, but never has it been so genuinely and completely proved as in "Robin Hood." The spectacle at the Majestic leads all the rest in this respect. No cultural course is needed to enable one to enjoy the compelling beauties of the cinema paintings in what is beyond the shadow of a doubt Douglas Fairbanks' greatest picture.

Really is the first impression one gets of "Robin Hood," but that is not by any means all there is to the picture. It has, in fact, all a good production should have and perhaps a little bit more.

Nothing is lost in these spectacular portions. The crowds are there, but so is the beauty of the scene as a whole. On the other hand, the beauty does not push itself forward at the expense of the action.

Douglas Fairbanks as Robin Hood was good—he always is—but his greatest triumph in the present instance is more as a producer than an actor.

Of the supporting cast, Wallace Beery as Richard the Lion Hearted contributed a truly remarkable performance, the sort of portrayal that had been on the stage he would become famous overnight and play it the rest of his life.

LYDD GETS IDEA IN A FLASH FOR NEW COMEDY

Ideas for comedies are rare. For the type of feature comedies that Harold Lloyd makes, they are rarer than gold.

The happy thought that led to the making of the spectacular comedian's latest and loveliest feature, "Safety Last," a seven-reel Pathécomedy, came like a flash out of a clear sky.

One day, about a year ago, Harold Lloyd and his producer, Hal Roach, were walking on a downtown street in Los Angeles. It so happened that at the Rosier Hotel that day, "Bill" Strother, known the world over as the "human fly," was putting his skill

"BIG GAME IN AFRICA"

H. A. Snow's remarkable picture of the Oakland expedition to the dark continent, "Hunting Big Game in Africa with Gun and Camera," comes to the Majestic the week of May 6.

Thrills, comedy, adventure, romance are skillfully alternated. Side-splitting antics of west coast penquins, wonders of Kimberley diamond mines, even trek through the Union of South Africa, and the extraordinary and amusing use of flippers that replaced them, constitute high points that lead up to thrilling encounters on the interior plateaus with the largest mammals yet roaming terrestrial surface—herds of African "bull" elephants, deadly-horned rhinos, treacherous buffaloes, lions, leopards and other great cats—which Mr. Snow and his son fearlessly met in the open and photographed with the unerring registry of animal drama and emotion.

Close-ups of animals unfamiliar to man dot the film. For instance, the production has to its credit the scientific achievement of picturing the rare Athi River giraffe; being the first to distinguish in picture the Barbel, Chapman and Grey species of zebras; and of photographing and adding to the Oakland Museum of Natural History's collection a white rhinoceros. There are only twenty of the last named species in existence.

TWO YEARS OF ADVENTURE SQUEEZED
INTO TWO HOURS OF THRILLS!

Ran three solid months at the Lyric, N. Y. C.
UNIVERSAL PICTURES Presented by Carl Laemmle

MAJESTIC THEATRE WEEK STARTING
SUNDAY, MAY 6th

which comes to the Rivoli theater today.

Miss Talmadge, of course, takes the stellar part made famous on the stage by Jane Cowl—that of Mary Turner, the little shop girl who is railroaded to jail for a department store theft she did not commit and who subsequently, through force of circumstances, joins a gang of black-malers, always keeping "within the law," and becomes the central figure of a stirring romance.

Of particular interest is the fact that three members of the cast played with the original stage company of "Within the Law." They are DeWitt Jennings, Lincoln Plummer and Lew Cody.

LONDON-BERLIN AIR SERVICE LAUNCHED

BERLIN—Inter-European air communications were greatly improved Tuesday with the first direct passenger flight from London to Berlin. The time, not including landings at Rotterdam, Amsterdam, Bremen and Hamburg, was six hours.

Opals are so soft when first taken from the ground that they may be pulled apart with the fingers.

**INTEREST SHOWN IN
HORSES WORKING OUT
ON CLEVELAND TRACK**

CHICAGO, Ill.—North Randall race track at Cleveland is a busy place these days with over 200 trotters and pacers quartered there, working out for the first grand circuit meeting of the season which opens at the famous track this week, beginning July 4. Never before in the history of the track have the horses shown so much speed as during the present workouts.

Much interest is shown in the great trotter Peter the Greaser, 2:02 1/4. Harness horse experts predict he will be the first two-minute horse sired by Peter the Great. Miss Harris M. sired by Peter the Great, has a record of 1:58 1/4 pacing.

SUICIDES OVER NIAGARA

NIAGARA FALLS, N. Y.—A man believed to be Fred Dean of Niagara Falls, Ont., committed suicide Tuesday by going over the American falls. He left a note reading, "I can stand this no longer."

TODAY Thursday, Friday, Saturday

Norma's here!

She'll play Mary Turner, the poor but beautiful shop girl, who, sent to jail because of a crime of which she's innocent, turns upon her persecutors and makes them pay and pay—

We'll say she's great!

And so will you when you see and know what makes her go into life of—not crime—oh, no! for that would not be within the law.

It's a role we'll say actresses cry to play!

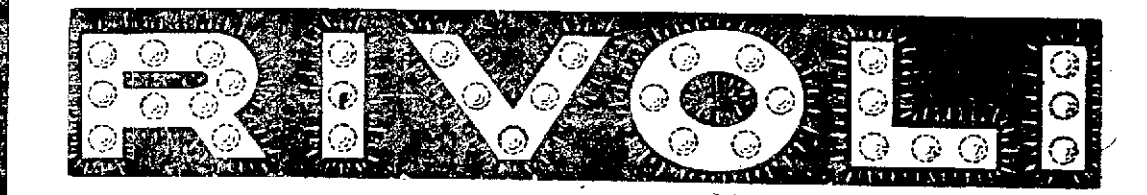

A truly great American play of today. It's about folks like us who do the best we can. And we all know that young and pretty girls who are poor walk a perilous path—these days—before they find themselves safe in the sanctuary of some good man's arms.

Norma's here!

JACK-TOM BOUT CERTAIN, KEARNS ADMITS TUESDAY

Papers Will be Signed as Soon as Minor Details are Arranged, Kearns Says

REPORT DEMPSEY TO SIGN FOR \$300,000; GIBBONS \$50,000

Shelby, Montana. Oil Town, is to be Scene of Bout July 4

NEW YORK.—Jack Dempsey and Tommy Gibbons are as good as matched to meet for the world's heavyweight championship in Shelby, Mont., on July 4, Jack Kearns, manager of the champion, admitted Tuesday morning.

The papers have not been signed but they will be as soon as a few minor matters are straightened out," Kearns said.

While the champion's manager would not give out the consideration for which Dempsey is to sign, it is understood that he is to get a certified check for \$300,000 as soon as the contract is signed, another \$100,000 in June and a final installment of \$100,000 forty-eight hours before he enters the ring.

Eddie Kane, manager of Gibbons, has already signed for a reported purse of \$50,000.

Battle Ground
GREAT FALLS, Mont.—Shelby, Mont., where it is proposed to hold a championship fight July 4 next, between Jack Dempsey and Tom Gibbons, challenger, is 100 miles north of Great Falls. Today it is a prosperous oil town, but when it surges into being back in the '20s it was little more than a big cattle camp.

The town's population consists largely of oil men and those persons necessary to the development of new oil fields. Many of the prosperous oil men are interested equally with the American Legion in bringing a championship heavyweight battle to Shelby.

State Legalizes Bouts
The Montana state boxing law, passed in 1920, permits fifteen round boxing contests to a decision, with six ounce gloves in a twenty-four four ring.

ROWDY ELLIOTT SIGNS WITH RACINE HORLICKS

RACINE, Wis.—Rowdy Elliott, all-around athlete of the University of Wisconsin, has signed to play with the Horlick Racine of the new Midwest Baseball League. Ray Fox, second baseman of the Toledo A. A. team, also has put his signature on the dotted line, it was announced.

NORMAL OPENS BASEBALL SEASON THURSDAY IN GAME WITH ST. THOMAS COLLEGE

COACH Nohr of the normal school baseball team announced Wednesday that everything is in readiness for the game Thursday afternoon with St. Thomas college of St. Paul. This will mark the first college game of the season for the locals, and they are confident that it will prove to be an interesting contest. Hoover will start on the mound for La Crosse with Nick Steneman on the receiving end.

St. Thomas played Columbia college at Dubuque Tuesday and are playing Luther college at Decorah on Wednesday.

The game here Thursday will start at 3:15. The second school game of the season for the normals will be played Saturday here, with Stout Institute as the opposing team.

The normal school is a member of the "Little Big Ten" baseball conference. Mr. Nohr stated, but will play only two baseball games with conference teams this season because of the fact that most of the other schools had completed their schedules before the conference was formed. The locals meet Columbia May 8th.

DUMOVICH PITCHES CUBS TO 3-1 WIN

Reds are Helpless Before the Hurling of Killefer's Youngster

CINCINNATI.—Dumovich held Cincinnati helpless in all but one inning on Tuesday, and Chicago won 3 to 1, going to second place in the National league race. Kiek was a little miscast, two of the Cubs' runs being due to bases on balls, while the third was earned in the ninth inning on consecutive singles by O'Farrell, Dumovich and Stutz. The Reds scored their only tally in the sixth on singles by Lupine and Bohne and a double by Heathcote. Score: Chicago, 3; Cincinnati, 1.

Batteries: Dumovich and O'Farrell; Kiek and Hargrave.

ST. LOUIS, Mo.—The Cardinals' winning streak ended at four victories when they lost to Pittsburgh on Tuesday, 6 to 2. Carey knocked a homer in the third, driving in Maraville, who had singled ahead of him. The visitors pounded Sherrill for nine safeties and he was relieved in the sixth by Stuart. Score: Pittsburgh, 6; St. Louis, 2.

NEW YORK, N. Y.—New York Nationals won their sixth game of the season from the Brooklyn club on Tuesday, 4 to 2. New York won in the fourth when O'Connell walked, took two bases on a wild throw by Egan and scored the winning run on Banerjee's sacrifice fly after Punch Hitter Smith had been intentionally passed. Home runs by Stewart and High accounted for all the Brooklyn runs. The score: New York, 4; Brooklyn, 2.

PHILADELPHIA, Pa.—Boston made it two straight from Philadelphia on Tuesday by winning a slugger's match, 12 to 6. Cy Williams got two home runs, a double and single. Boston took an early lead, but Beland dropped them in the fourth and the Red Sox tied the score in the sixth only to lose out in the ninth. Score: Boston, 12; Philadelphia, 6.

M'CAULEY BATS 1.000 BOBBY MOORE STARS IN GAMES ON MONDAY

"Self" McCauley, Montague slab artist last season and who will again perform for local fans with the same club this year, has been going good so far this season with Columbia College of Dubuque, his school team. In Monday's game with DePaul, which Columbia won 10 to 8, McCauley batted 1.000, whiffing out a two bagger and four singles in five trips to the plate. He played first base Monday.

Another ball player whose career local fans are following with interest is "Bobby" Moore, also of last year's city champion Montague team. In the last pre-season game Monday he was credited with two assists and five put-outs at third base, with no errors. He failed to connect for hits Monday. He was scheduled to play in the opening game of the M. V. league with Waterloo which Dubuque won, 7 to 4 on Tuesday.

GILL AND D'ARCY MATCHED TO FIGHT AT PEORIA MAY 14

La Crosse "Speed Boy" in Return Bout With Illinois Ring Champion

Jimmy Gill, the La Crosse "Speed Boy," has been matched to fight Stanley D'Arcy, university of Illinois champion on an all star card at Peoria on May 14th, he announced Tuesday afternoon.

Gill and D'Arcy have met before in the same town, battling eight rounds on Dec. 22. In the other fight, says Jimmy, they put up a good show and made a hit with the fans. Jimmy got the newspaper decision by a shade from one paper, another called the fight a draw.

Harry Greb and Foley will fight on the same card May 14th.

Gill will train at the Old State Inn every afternoon at four o'clock until two or three days before he fights.

NOTRE DAME ROUTS BADGERS, 16-2, IN CONTEST MONDAY

NOTRE DAME, Ind.—Notre Dame smothered Wisconsin, 16-2 Monday in a seven-inning game called to permit the Cardinals to catch a train. Fahey pitched tight ball all the way but the Irish clouted Rutke and Shranek at will, scoring nine runs on seven consecutive hits in the fourth inning.

Nolan was the big star of the game. He hit safely four times in a row and checked a Badger rally in the fourth with a sensational catch. Gibson made a circus catch in center field and Sheehan and Foley completed a fast double play.

Score by Innings:

	R	H	E
Wisconsin	1	10	1
Notre Dame	16	9	4

Batteries: Wisconsin, Rutke, Shranek, Aschenbrenner and Pollock; Notre Dame, Fahey, Curtin and Welch.

CHICAGO, Ill.—Chicago bunched hits behind errors by Fenber and bases on balls and defeated St. Louis, 3 to 2, on Tuesday. In the eighth inning, Collins' bunt paved the way for a run. Williams' home run smash into the right field bleachers, his fifth of the season, and the first on the local grounds this year, netted the visitors two more runs in the ninth as Robin scored in front of the slugger. The holding of McClellan and Moss's batting were features. Score: Chicago, 3; St. Louis, 2.

Batteries: Chicago, Ruett and Severeid; Laverette and Schulz.

DETROIT, Mich.—After pitcher Edwards had scored what appeared to be the winning run for Cleveland in the ninth inning, Detroit rallied and won Tuesday's game from the Indians, 6 to 5. Edwards hit safely four times, accounting for three of Cleveland's runs. Score: Cleveland, 6; Detroit, 5.

DETROIT, Mich.—After pitcher Edwards had scored what appeared to be the winning run for Cleveland in the ninth inning, Detroit rallied and won Tuesday's game from the Indians, 6 to 5. Edwards hit safely four times, accounting for three of Cleveland's runs. Score: Cleveland, 6; Detroit, 5.

UP-HILL FIGHTS FEATURE TUESDAY'S GAMES IN THE MAJOR LEAGUE DIVISIONS

CHICAGO, Ill.—By The Associated Press.—Three major league teams won their games Tuesday in up-hill fights, smothering out victories in late-inning game spurts. The Giants defeated the Brooklyn Dodgers in the ninth, four to three, and Detroit's Tigers battered the Cleveland Indians in a ninth inning rally, winning six to five. The New York Yankees came up from behind to defeat Washington, getting six runs in the seventh inning for an eight to seven victory.

A raw-boned rookie from the open spaces of Texas, Fred Johnson, pitched for the Giants, and was largely responsible for the Dodger defeat. Burleigh Grimes, Dodger pitching ace, allowed but six hits, but the Texas rookie gave out only five. The late-inning Cleveland game was a free hit affair. The Tigers getting twelve bingles in Washington's 12. The Yankees got 14 hits in Washington's 12. In addition to hitting out two two-baggers and a single, Babe Ruth stole home with the tying run.

Pirates Stop Cards
Pittsburgh's Pirates ended the St. Louis Cardinals' winning streak, defeating them 6 to 2. The Boston Braves won a hard hitting game from the Philadelphia Nationals, 12 to 15. The Braves made 15 hits and the Phillies cracked out 17.

The Boston Red Sox defeated the Philadelphia Athletics, 5 to 4. The second place tie in the National league was broken when the Cubs defeated the Cincinnati Reds, 3 to 1. The Cubs moved into second place, with Boston in third and Cincinnati in fourth place.

Chicago's Americans, the White Sox, also got into the win column, defeating the St. Louis Browns, 5 to 3.

Ehmske Fans Ten
Howard Ehmske, traded by the Indians to the Red Sox, hung up a season's record for strikeouts when he fanned ten of the Athletics.

Ray Elick, former Sioux City star, with the White Sox pulled one for the book in the ninth inning of the game against the Browns. Several fled to left and Elick raced in, catching the ball. Swinging around he threw it to the fans in the left field bleachers thinking the game was over. It was only the second out and the players and spectators gave him the laugh.

Ken Williams of the Browns, by smothering out his fifth inning of the season had the honor of driving out the first circuit drive of the year at Comiskey park.

said. But there will be no signing, he added.

"Most of the rules in the code are supported in rules of the game and therefore are in force already," Uteritz declared.

SCOTT TO PLAY IN THOUSANDTH GAME WEDNESDAY

WASHINGTON.—Everett Scott, veteran shortstop of the New York Yankees, was prepared to set a mark in consecutive major league games played will probably survive many generations of his professional brethren on entering his one thousandth contest here Wednesday. Scott said he felt as fit for the game that rounds out his long ambition to attain this record as he did when he entered the first contest of 1,000 games on the twelfth day of June, 1916, as a Boston American.

LA CROSSE HIGH IS ENTERED IN RELAY CARNIVAL

Team Will Go to Milwaukee on May 12 to Compete in Marquette U. Carnival

La Crosse high is to be one of the fifteen or twenty of the schools of the state to meet at Milwaukee on May 12 to compete in the first annual Marquette university high school relay carnival.

Blanks for the event were mailed by Conrad Jennings, track coach at Marquette last week and 12 entries have already been received. Among them are five Milwaukee high schools (Riverside, West, North, South and Washington) and Janesville, Racine, Kenosha, Madison, La Crosse, West Allis and South Milwaukee.
